[Banking in China \(1890s-1940s\)](#) - Hubert Bonin 2020-04-28

From the 1890s to the 1940s, French State and entrepreneurial companies were enticed to promote French interests, beyond mere colonial targets, for the sake of economic patriotism. Chinese concessions, not including Hong Kong, were thus inserted into geo-economic moves, and French stakeholders asserted their philosophy of competition, and displayed their means of influence and investment. In this book, the author assesses the challenges which confronted French actors in the face of powerful British imperial action overseas, all the more so because German Belgian, Japanese, and then also North-American competitors joined the fray. The book targets three concessions: Canton/Guangzhou, Tientsin/Tianjin, and Hankeou/Wuhan because of their significance in the emergence of a modern economy in the country. The three main sections of the book explore the position of French stakeholders, mainly businessmen, merchant houses, bankers, and a few industrialists, in these three port-cities and China overall. The chapters gauge their capital of influence and networking, commercial tools, and banking skills in the face of competition, the hardships of crossing the changes in economic productive systems or clusters in the various port-cities and their areas, rich with commercial offshoots. Also, several chapters underscore the uncertainties caused by geopolitical and military events in China. For each of the three concessions, commercial and banking systems, assessments of the successes and limits of the French bankers and merchants are investigated, with the aim of evaluating the reality of French entrepreneurialism and power in the regions prospected by the offshoots of French capitalism. The book will be an invaluable resource for academics interested in the history of banking and finance, business, entrepreneurship, colonialism and "economic patriotism" in Chinese history, in geo-economics and in connected history.

[Digital Transformation in Islamic Finance](#) - Yasushi Suzuki 2022-12-30

The ongoing digital transformation is shaping the Islamic mode of financial intermediation and the impact on the faith-based financial mode has been multifaceted. This has raised a host of interesting questions: what is the degree of penetration of Islamic finance in the fintech industry? Are Islamic financial institutions (IFIs) or banks ready to embrace fintech? Is fintech an enabler or barrier to achieve the intended purpose of Islamic finance? Will technology narrow the division between Islamic and conventional finance in the future? These are existential questions for Islamic finance and the book endeavors to examine the impact of financial technology on the industry. The book assesses various fintech business models and how they could be a threat or an opportunity. It also examines whether fintech provides IFIs an edge to serve clients following the Shariah norms and how the adoption of fintech in the Islamic mode is required for meeting the maqasid Al Shariah. The book discusses applicability of fintech like blockchain, digital currency, big data, and AI to different branches of Islamic finance. This book will interest students, analysts, policymakers, and regulators who are working on Islamic finance, financial economics, Islamic economics, and development finance.

[The Regulation of the London Clearing Banks, 1946-1971](#) - Linda Arch 2018-11-02

This book explores the way in which banks were regulated in the UK in the period from 1946 until 1971. It focuses upon a group of 11 banks known as the London clearing banks. These banks included the 'Big Five' - Barclays, Lloyds, Midland, National Provincial and Westminster - and were the equivalent to today's retail banks. The time period in question is an intriguing one in the history of banking and bank regulation in that the banking system was very stable, but the regulatory framework was less dependent upon codified forms of regulation than it is today. Having explored the nature of clearing bank regulation, Arch goes on to consider the rationale behind it, as well as its consequences. She concludes by reflecting upon the nature of bank regulation since the global financial crisis. This title is essential reading for academics with an interest in banking history and bank regulation, for practicing bank regulators and for regulatory policymakers.

**E-Voting and Identity** - James Heather 2013-07-08

This book constitutes the thoroughly refereed conference proceedings of the 4th International Conference on E-Voting and Identity, Vote ID 2013, held in Guildford, UK, during July 17-19, 2013. The 12 revised full papers presented were carefully selected from 26 submissions. The papers include a range of works on end-to-end verifiable election systems, verifiably correct complex tallying algorithms, human perceptions of verifiability, formal models of verifiability and, of course, attacks on systems formerly advertised as verifiable.

[Delegation of Powers in the EU Legal System](#) - Annalisa Volpato 2022-03-30

The majority of rules adopted at the EU level are not issued by democratically elected institutions, but rather by administrative bodies which are empowered to exercise rule-making powers by legislative acts. This book analyses the legal mechanism through which these powers are conferred on the most relevant bodies in the EU institutional landscape, namely the European Commission, the Council, the ECB and EU agencies, and the democratic controls in place to limit and oversee the exercise of these powers. Providing an overarching perspective of the delegation of powers, this book reflects on the notion of delegation and

on the commonalities between the different forms of delegation identified. It focuses on the legal requirements and limits for the delegating act, the procedures for the exercise of such powers, the position of the acts in the hierarchy of norms, and their judicial review. Overcoming the fragmentation which characterized the development of the different forms of delegation in the EU, this analysis provides a clear, structured, and coherent picture of the legal framework for the delegation of powers in the light of the constitutional principles of this legal system. Academics and practitioners will equally appreciate this highly accessible addition to the current debate in legal scholarship of the delegation of powers in the EU, as well as its explanations on comitology and the empowerment of EU agencies.

*Financial Liberalization and Economic Performance* - Luiz Fernando de Paula 2012-07-26

Since the beginning of the 1990s, Brazil has followed a pattern of economic development inspired by Washington Consensus. This framework includes a set of liberalising and market friendly policies such as privatisation, trade liberalization, stimulus to foreign direct investment, tax reform, and social security reforms. This book assesses the determinants and impacts of financial liberalisation in Brazil considering its two dimensions: the opening up of the balance of payments capital account, and the penetration by foreign bank of the domestic banking sector. The author combines theoretical and empirical analyses. Some make use of mathematical models and/or statistical techniques; however, they are only used when they are strictly necessary to the analysis.

*Decision Taking, Confidence and Risk Management in Banks from Early Modernity to the 20th Century* - Korinna Schönhärl 2017-01-26

This book offers 14 contributions that examine key questions in bank decision-taking, constitution of confidence in banks and risk management practices from Early Modernity to the twentieth century. It explores how the various mechanisms of bank decision taking changed over time. Chapters also analyse the types of risk management techniques used, the contributory factors to the constitution of confidence and the methods that banking historians can use to analyse and describe bankers' risk management and decision taking - from system theory to behavioural finance, new institutional economics to praxeology and convention theory to network analysis. The different methodological approaches are put to the test in case studies based on archive material from four hundred years of banking in order to connect banking history more closely to political and cultural history.

**E-banking: An Essential Sector in Banking Industry** - Salman Ahmed 2013-01-03

The purpose of our research work is carried out to release the importance of E-banking in banking industry, which is being implemented by the banks for providing the electronic services to the customers and to what extent E-banking is growing and giving the benefits to both the customers as well as the bankers. This research work will also help to determine whether the E-banking services are efficient, accurate and rapid in banking industry.

**Central Banking before 1800** - Ulrich Bindseil 2019-12-19

Although central banking is today often presented as having emerged in the nineteenth or even twentieth century, it has a long and colourful history before 1800, from which important lessons for today's debates can be drawn. While the core of central banking is the issuance of money of the highest possible quality, central banks have also varied considerably in terms of what form of money they issued (deposits or banknotes), what asset mix they held (precious metals, financial claims to the government, loans to private debtors), who owned them (the public, or private shareholders), and who benefitted from their power to

provide emergency loans. *Central Banking Before 1800: A Rehabilitation* reviews 25 central banks that operated before 1800 to provide new insights into the financial system in early modern times. *Central Banking Before 1800* rehabilitates pre-1800 central banking, including the role of numerous other institutions, on the European continent. It argues that issuing central bank money is a natural monopoly, and therefore central banks were always based on public charters regulating them and giving them a unique role in a sovereign territorial entity. Many early central banks were not only based on a public charter but were also publicly owned and managed, and had well defined policy objectives. *Central Banking Before 1800* reviews these objectives and the financial operations to show that many of today's controversies around central banking date back to the period 1400-1800.

**The Emergence of Modern Central Banking from 1918 to the Present** - Carl-L. Holtfrerich 2016-12-05

The twentieth century has seen the rise of modern central banking. At its close, it is also witnessing the first steps in the decline of the role of some of the most famous of these institutions. In this volume, some of the world's best known specialists examine the process whereby central banks emerged and asserted themselves within the economic and political spheres of their respective countries. Although the theory and the political economy that presided over their creation did not show great divergence across borders, a considerable institutional variety was nevertheless the result. Among the many factors responsible for this diversity, attention is drawn here not only to the idiosyncrasies of domestic financial systems and to the occurrence of political shocks with major monetary repercussions, such as wars, but also to the peculiarities of each economy and of the political and social climate reigning at the time when central banks were created or formalized. The twelve essays cover European, Asian and American experiences and many of them use a comparative approach.

*Banksters, Bosses, and Smart Money* - Timothy Messer-Kruse 2004

*Banksters, Bosses, and Smart Money* uncovers the causes of one city's economic collapse by tracing the interlocking directorships, political machines, and insider deals that made quick fortunes for the well-connected while jeopardizing the savings of tens of thousands of depositors. It documents how the power of the city's financial elites continued even after the calamitous bank crash of 1931, skewing the liquidation of insolvent banks in their favor and shielding those responsible from criminal prosecution.

*Central Banking, Monetary Policy and the Future of Money* - Vallet, Guillaume 2022-08-16

Part of The Elgar Series on Central Banking and Monetary Policy, this book explores the relationship between central banking, monetary policy and the economy at large, focusing on the specific relationship between central banking, monetary policy and the future of money.

**ECDG 2018 18th European Conference on Digital Government** - 2018-10-25

The European Conference on e-Government has been running now for 18 years. This event has been held in Italy, Ireland, Belgium, UK, Slovenia, to mention a few of the countries who have hosted it. This year we are refocusing the conference to look more broadly at the area of Digital Government. The conference is generally attended by participants from more than 40 countries and attracts an interesting combination of academic scholars, public sector workers and individuals who are engaged in various aspects of Digital Government research and application.

**Emerging Issues and Prospects in African E-Government** - Sodhi, Inderjeet Singh 2014-07-31

Efforts have been made toward the application of electronic government in the developing world, yet questions of how to best implement governance systems and address concerns from officials and citizens alike remain to be answered. *Emerging Issues and Prospects in African E-Government* explores relevant practices, trends, and potential challenges facing fledgling governments in the digital era. This book focuses on the establishment and maintenance of e-government in various African countries, providing critical insights for government bodies, policymakers, administrators, and public sector researchers working in local, state, and national governments around the world.

**The Oxford Handbook of the Brazilian Economy** - Edmund Amann 2018-08-01

Brazil is a globally vital but troubled economy. This volume offers comprehensive insight into Brazil's economic development, focusing on its most salient characteristics and analyzing its structural features across various dimensions. This innovative Oxford Handbook provides an understanding of the economy's

evolution over time and highlights the implications of the past trajectory and decisions for current challenges and opportunities. The opening section covers the country's economic history, beginning with the colonial economy, through import-substitution, to the era of neoliberalism. Second, it analyses Brazil's broader place in the global economy, and considers the ways in which this role has changed, and is likely to change, over coming years. Particular attention is given to the productive sectors of Brazil's economy, for example manufacturing, agriculture, services, energy, and infrastructure. In addition to discussions of regional differences within Brazil, socio-economic dimensions are examined. These include income distribution, human capital, environmental issues, and health. Also included is a discussion of Brazil in the world economy, such as the increase in "South-South" cooperation and trade as well as foreign direct investment. Last but not least is a discussion of the role of the Brazilian state in the economy, whether through state enterprises, competition policy, or corruption.

**Performance Evaluation And Customer Satisfaction Of Public Sector Banks And New Generation Private Sector Banks In The Post Liberalised Era** - Dr Aloysius O.C

**Competition Policies in Emerging Economies** - Claudia Schatan 2008-07-11

As countries large and small, rich and poor are drawn inexorably into the global economy, protectionist policies are proving increasingly inefficient and ineffective for driving growth. The countries of Latin America, which have long pursued agendas of state ownership and heavy regulation of key industries, began to institute a series of reforms in the 1980s and 1990s, designed to promote competition and business creation. However, without the legal and institutional framework to support these policies (and thus guarantee resource-efficient behavior on the part of business owners), the record has been spotty at best. *Competition Policies in Emerging Economies* features in-depth analysis of two key industries—telecommunications and banking—in several Central American nations to shed light on the dynamics of the transition to deregulation and trade liberalization, and learn from the experiences of these economies. This book has a three-fold purpose: (1) to examine the competition conditions and policies of small developing countries of Central America (and hence cover an area where very little information exists); (2) develop an in-depth analysis of regulation and competition policies in two key industrial sectors with poor competition records (telecommunications and banking); (3) link the former results analysis with other international experiences, in order to derive research and policy recommendations that can be applied to other small, developing, and emerging economies. Featuring discussion of political, legal, economic, financial, cultural, and organization-level issues, the book provides unique perspectives on the forces resisting competitive practices and offers suggestions for overcoming them.

**PERFORMANCE OF COMMERCIAL BANKS IN GOA** - Dr. Sukhaji G. Naik

**Macroeconomic Policies for Stable Growth** - Delano Villanueva 2008

"This volume is a collection of published and unpublished papers that the author has written over the last two decades during part of his tenure at the International Monetary Fund, the South East Asian Central Banks Research and Training Center, and Singapore Management University. The policy-oriented book examines the links between macroeconomic policies and noninflationary, full-employment levels and growth rates of aggregate gross domestic product, with particular focus on the application in emerging markets of the tools of growth theory. Theoretically sound and grounded in practical wisdom, this book is an essential reading for economic, financial and developmental policymakers, professional economists, and undergraduate/graduate students in economics and social sciences."--BOOK JACKET.

**Research Methodology in the Built Environment** - Vian Ahmed 2016-03-10

Built environment students are not always familiar with the range of different research approaches they could be using for their projects. Whether you are undertaking a postgraduate doctoral programme or facing an undergraduate or masters dissertation, this book provides general advice, as well as 13 detailed case studies from 16 universities in 7 countries, to help you get to grips with quantitative and qualitative methods, mixed methods of data collection, action research, and more.

**Innovations in Banking** - Tim Morris 2012

Banking and finance is one of the most successful and rapidly expanding sectors in the world economy.

From the 1960s this whole area of employment has undergone profound changes. The banks diversified, adopted new corporate strategies, introduced new technologies and faced new and intense competition. This book examines the importance of employee relations strategies in contributing to a prosperous industry. Drawing upon a wide range of original and undocumented material derived from the banks and the unions, it explores both employer and union strategies and examines the continuing competition for predominance between the 'orthodox' trade unions and the staff associations.

*The Political Economy of Sentiment* - Jose R Torre 2015-09-30

Situates changes in the nature of money and the rise of sophisticated financial structures at the centre of the Enlightenment. This work argues that paper credit instruments were causal - critical to the larger epistemological and psychological changes associated with the Enlightenment's reconstruction of value.

**Norges Bank 1816-2016** - Einar Lie 2020-04-23

Norges Bank has been an integrated part of Norwegian economic development from the complicated birth of the new nation-state after the Napoleonic wars to the present nouveau-richness of the Norwegian oil economy. This book traces its 200-year history, focusing on its relations with political institutions that have shaped and reshaped the bank's role since its establishment in 1816. In the first fragile years of the new nation, Norges Bank took centre stage in the discussion on how to reconstruct a collapsed monetary system, and how trust and resources should support the core financial function of the State apparatus. The financial and political role of the bank came to the fore from the late 1800s and peaked during the turbulent interwar years of the 1920s, after which the bank became the foremost defender of the monetary order and the gold standard, in bitter conflict with the emerging Labour Party. The blow that the Second World War delivered to central bank independence left the bank firmly subordinated to the Ministry of Finance. Not until 1986 was larger autonomy in monetary policy granted, and since then the bank's weight and responsibilities have continued to expand with its position as manager of the Norwegian oil fund. The bank's role has been largely defined by perceptions of what kind of financial services Norway needed, how economic policy was coordinated, and how discretionary power was distributed between the elected bodies, the executive branch, and underlying institutions with a defined mandate. The central aim of this book is to trace and explain these changes over the past two centuries.

**Sustainable Education and Development -- Making Cities and Human Settlements Inclusive, Safe, Resilient, and Sustainable** - Joseph N. Mojekwu 2021

This book presents papers from the 10th Applied Research Conference in Africa (ARCA), showcasing the latest research on education and inclusive, safe, resilient, and sustainable communities. The conference is focused on applied research discussion and its dissemination, developing understanding about the role of research and researchers in the development of the continent. Education is a key driver to transform lives, build peace, eradicate poverty and drive sustainable development in Africa. Researchers face large challenges to making a meaningful contribution to the development of Africa. It is a continent where research can at time be not viewed directly related to development. The aim of the Applied Research Conference in Africa is to provide a platform for capacity building and networking among researchers in Africa. The proceedings is focussed on applied research, its discussion and dissemination and will be of interest to researchers, professors, graduate students, policymakers and professionals in industry.

**The Globalization of Merchant Banking before 1850** - Manuel Llorca-Jaa 2017-07-05

London merchant bankers emerged during the 1820s in the wake of financial turmoil caused by the wars of American Independence, the Napoleonic campaigns and the Anglo-American war of 1812. Though the majority of merchant bankers remained cautious in their affairs, Huth & Co established an impressive global network of trade and lending, dealing with over 6,000 correspondents in more than seventy countries. Based on archival research, this comparative study provides a new chronology of early nineteenth-century commercial and financial expansion. Huth & Co. were truly market-makers and key intermediaries of commodities and capital flows in the international economy. This is an important example of a firm shaping globalisation well before the transport and communication revolution of the last quarter of the nineteenth century. But rather than a case study, this is a comparative study concerned with the commercial and financial activities of the leading merchant-bankers of the period. This book will be of great interest to business and economic historians interested in the nature of the early decades of the first

globalization.

*Nationalism, Capitalism, and Colonization in Nineteenth-Century Quebec* - John Irvine Little 1989

In the late 1830s the governments of Britain and Lower Canada, the Catholic Church, and a number of capitalist enterprises began to play a role in the settlement and exploitation of the economically marginal Upper St Francis district of Southern Quebec. British attempts to encourage immigration were largely unsuccessful but by mid-century the building of roads attracted a flood of French Canadians from the south-shore seigneuries.

**French Banking and Entrepreneurialism in China and Hong Kong** - Hubert Bonin 2019-06-07

Many books have addressed the economic and financial history of Hong Kong, and the imperialist conflicts in the key Chinese port-cities but very few books have explored French initiatives and performance in this area, beyond diplomacy, geopolitics or cultural issues. In this book, Hubert Bonin confronts arguments about "the great divergence", "the first globalisation", and forms of "economic patriotism". He gauges the competitive edge of French companies and banks, their struggle with British domination (HBCS, Chartered, shipping, trade houses/hongs) and their resistance against competitors from other countries (Japan, Germany, Netherlands, Belgium, USA, or Russia). The book delves into studies of management abroad, therefore mixing broad geo-economic issues with precise business history and deep banking history. The connections between French interests in China and Hong Kong and the colony of Indochina are established too. A second part of the book is dedicated to the case study of Hong Kong, as the British colony acted as a hub for Asian and European interests at the heart of connections with mainland China and some neighbouring territories (Indochina, etc.). This is essential reading for academics interested in banking and business history, the history of entrepreneurship, as well as, those involved in the contemporary history of China and Hong Kong, in the assessment of world-wide geo-economic competition between European powers in Asia (Great-Britain, and France), and in the first stages of economic "modernity", along European models, in emerging modern China.

**IMDC-SDSP 2020** - Raed Abd-Alhameed 2020-09-09

IMDC-SDSP conference offers an exceptional platform and opportunity for practitioners, industry experts, technocrats, academics, information scientists, innovators, postgraduate students, and research scholars to share their experiences for the advancement of knowledge and obtain critical feedback on their work. The timing of this conference coincides with the rise of Big Data, Artificial Intelligence powered applications, Cognitive Communications, Green Energy, Adaptive Control and Mobile Robotics towards maintaining the Sustainable Development and Smart Planning and management of the future technologies. It is aimed at the knowledge generated from the integration of the different data sources related to a number of active real-time applications in supporting the smart planning and enhance and sustain a healthy environment. The conference also covers the rise of the digital health, well-being, home care, and patient-centred era for the benefit of patients and healthcare providers; in addition to how supporting the development of a platform of smart Dynamic Health Systems and self-management.

**Sveriges Riksbank and the History of Central Banking** - Rodney Edvinsson 2018-05-24

Written in celebration of its 350th anniversary in 2018, this book details the history of the central bank of Sweden, Sveriges Riksbank, as presented by Klas Fregert. It relates the bank's history to the development of other major central banks around the world. Chapters are written by some of the more prominent scholars in the field of monetary economics and economic history. These chapters include an analysis of the Bank of England written by Charles Goodhart; the evolution of banking in America, written by Barry Eichengreen; a first account of the People's Bank of China, written by Franklin Allen, Xian Gu, and Jun Qian; as well as a chapter about the brief but important history of the European Central Bank, written by Otmar Issing.

*Digital and Social Media Marketing* - Nripendra P. Rana 2019-11-11

This book examines issues and implications of digital and social media marketing for emerging markets. These markets necessitate substantial adaptations of developed theories and approaches employed in the Western world. The book investigates problems specific to emerging markets, while identifying new theoretical constructs and practical applications of digital marketing. It addresses topics such as electronic word of mouth (eWOM), demographic differences in digital marketing, mobile marketing, search engine advertising, among others. A radical increase in both temporal and geographical reach is empowering consumers to exert influence on brands, products, and services. Information and Communication Technologies (ICTs) and digital media are having a significant impact on the way people communicate and fulfil their socio-economic, emotional and material needs. These technologies are also being harnessed by businesses for various purposes including distribution and selling of goods, retailing of consumer services, customer relationship management, and influencing consumer behaviour by employing digital marketing practices. This book considers this, as it examines the practice and research related to digital and social media marketing.

*Banking Across Boundaries* - Brett Christophers 2013-01-07

This compelling contribution to contemporary debates about the banking industry offers a unique perspective on its geographical and conceptual 'placement'. It traces the evolving links between the two, revealing how our notions of banking 'productiveness' have evolved alongside the shifting loci of banking activity. An original contribution to the urgent debates taking place on banking sparked by the current economic crisis Offers a unique perspective on the geographical and social concept of 'placement' of the banking industry Combines theoretical approaches from political economy with contemporary literature on the performativity of economics Details the globalization of Western banking, and analyzes how representations of the banking sector's productiveness have shifted throughout the evolution of Western economic theory Analyzes the social conceptualization of the nature - and value - of the banking industry Illuminates not only how economic ideas 'perform' and shape the economic world, but how those ideas are themselves always products of particular economic realities
