Walter Map and the Matter of Britain - Joshua Byron Smith
2017-06-26

Why would the sprawling thirteenth-century French prose Lancelot-Grail Cycle have been attributed to Walter Map, a twelfth-century writer from the Anglo-Welsh borderlands known for his stinging satire, religious skepticism, ghost stories, and irrepressible wit? And why, though the attribution is spurious, is it not, in some ways, implausible? Joshua Byron Smith sets out to answer these and other questions in the first English-language monograph on Walter Map—and in so doing, he offers a new explanation for how narratives about the pre-Saxon inhabitants of Britain, including King Arthur and his knights, first circulated in England. Smith contends that it was inventive clerics like Walter, and not traveling minstrels or professional translators, who popularized these stories. Smith examines Walter's only surviving work, the *De nugis curialium*, to demonstrate that it is not the disheveled text that scholars have imagined but rather five separate works in various stages of

completion. This in turn provides new evidence to support his larger contention, that ecclesiastical networks of textual exchange played a major role in exporting Welsh literary material into England. Medieval readers incorrectly envisioned Walter withdrawing ancient Latin documents about the Holy Grail from a monastery and compiling them in order to compose the Lancelot-Grail Cycle. In this detail they were wrong, Smith acknowledges, but a model of literary transmission that is not vernacular and popular but Latinate and ecclesiastical demands our serious consideration.

Participatory reading in late-medieval England - Heather Blatt 2018-05-11

This electronic version has been made available under a Creative Commons (BY-NC-ND) open access license. This book traces affinities between digital and medieval media, exploring how reading functioned as a nexus for concerns about increasing literacy, audiences' agency, literary culture and media formats from the late fourteenth to the early sixteenth centuries. Drawing on a wide range of texts, from well-known poems of Chaucer and Lydgate to wall texts, banqueting poems and devotional works written by and for women, Participatory reading argues that making readers work offered writers ways to shape their reputations and the futures of their productions. At the same time, the interactive reading practices they promoted enabled audiences to contribute to - and contest - writers' burgeoning authority, making books and reading work for everyone.

Covert Operations - Karma Lochrie 2012-05-28

Selected by Choice magazine as an Outstanding Academic Book In Covert Operations, Karma Lochrie brings the categories and cultural meanings of secrecy in the Middle Ages out into the open. Isolating five broad areas—confession, women's gossip, medieval science and medicine, marriage and the law, and sodomitic discourse—Lochrie examines various types of secrecy and the literary texts in which they are played out. She reads texts as central to Middle English studies as the "Parson's Tale," the "Miller's Tale," the *Secretum Secretorum*, and Sir Gawain and the Green Knight as well as a broad range of less familiar works, including a gynecological treatise and a little-known fifteenth-century parody in which gossip and confession become one. As she does so she reveals a great deal about the medieval past—and perhaps just as much about the early development of the concealments that shape the present day.

The Victorians and the Eighteenth Century - Francis O'Gorman 2017-07-05

Disrupting the common assumption that the Victorians regarded their eighteenth-century predecessors with little interest or with disdain, the essays in *The Victorians and the Eighteenth Century* propose a re-examination of these relationships. Together, they expose some of the significant and complex ways in which key aspects and texts of the eighteenth century were situated, read, and transacted within the post-Romantic nineteenth century. Individual essays examine the influence of the work of Pope and the eighteenth-century novelists such as Johnson, Chatterton, and Rousseau on a range of Victorian writers and cultural productions, including Dickens, Eliot, Oliphant, Ruskin, historical fiction,

late Victorian art criticism, The English Men of Letters series, and the Oxford English Dictionary. The contributors challenge long-held views about Victorian uses of the past, and offer new insights into how the literature and culture of the eighteenth century helped shape the culture and identity of the nineteenth. This collection of essays by an impressive array of scholars, with a Preface by David Fairer, represents a unique

approach to this area of literary history and offers new perspectives on the nature and methodology of 'periodization'. While it is obviously of great interest to students of eighteenth-century and Victorian literature, it will also appeal to readers more broadly concerned with questions of literary influence, periodization, and historiography.
