Designs and Instructions for Irish Crochet Lace (Classic Reprint) - T. Buettner and Co. Inc 2016-10-05

Excerpt from Designs and Instructions for Irish Crochet Lace In the sprays the cord padding is an important factor, for by its tightness or looseness, stems or leaves of various designs can be curved in any direction desired and give a life-like appearance to the ower, which the counted stitches alone can never give. The directions for a spray may be followed very carefully by two work ers, and yet they may obtain quite different results. When a spray shows signs of getting either saucer shaped or frilled, when it should lie at, the worker will have to use her own discretion, increasing or diminishing number of stitches in order to bring out the desired result. The aim of the worker should be, to pro duce the most artistic work she is capable of; if, by altering a curve or adding a leaf to any spray she can create a design more pleasing to herself, she should not hesitate to follow her own inclination. These instructions are intended for those who wish to become good workers, and to them it is necessary to explain the object in View. They must understand that two workers seldom work alike, and the same

spray from these directions, by two different persons, might turn out to be of a different size. In order to teach each detail in a clear manner it is necessary to give exact number of stitches for it, but when it is once mastered a worker may discontinue the counting. Every worker after a time should be able to work from a drawing and until she can at least to some extent follow one the highest perfection in Irish crochet can not be obtained. Careful observation, however, will soon enable anyone to work any ower, composed of rings and petals, from a drawing. Irish Crochet Lace - Eithne D'Arcy 2003

"Of all the forms of crochet lace that are known, 'Irish Crochet' is most sought after and is probably the best known. While the Irish tradition for producing this work dates back to the sixteenth century, when it was known as 'nuns work' from the fact that the technique and style was developed in Irish convent communities in imitation of continental European lacemaking styles, the manufacture of crochet lace did not become a cottage industry

in Ireland until the middle of the nineteenth century, after the devastation caused by the Great Famine of the 1840s, when the development of home crafts was encouraged to create some small income for otherwise destitute families." "A lifelong involvement with the Irish lacemakers inspired Mrs d'Arcy to record her knowledge and to describe the traditional motifs and patterns that were gradually being lost as the old lace makers died out. Irish Crochet Lace is both a pictorial record of one of Ireland's finest crafts and a practical manual which sets out in order the steps in construction of a wide range of traditional motifs that can be built up into unique and beautiful designs."--BOOK JACKET.
