*Artistic Pedagogical Technologies: A Primer for Educators* - Katherine J. Janzen 2019-09-19

Research has shown that what students desire most in the post-

secondary milieu is engagement. As traditional forms of teaching that include lecture or PowerPoint presentations no longer adequately engage today’s technology adept students, educators may find themselves at a loss for where to locate teaching strategies which both engage students, and are tried and tested in an actual classroom setting. This book does just that. It provides a critical look at not only what is lacking in today’s classrooms to promote engagement, but actual solutions and strategies to help nurse educators as they prepare to teach. Artistic Pedagogical Technologies were first envisioned by Dr. Beth Perry in 2005, while over twelve years of research confirms that these arts-based teaching strategies actually work. As theory-based topics can be among the most difficult to engage students, included in this book are selected lesson plans that have been employed in actual classrooms. In total thirty five strategies are provided that can be utilized in a variety of classroom settings and applied to various nursing topics. Students, as part of the human family, have an innate need to be creative. This creativity can display itself within Artistic Pedagogical Technologies as a melding of technology, edutainment and play. The strategies in Artistic Pedagogical Technologies: A Primer for Educators have changed the classroom life of the authors as educators, and they can change your teaching too.

**Illuminating The Dark Side of Occupation** - Rebecca Twinley 2020-10-19

This innovative volume introduces Twinley's concept of 'The Dark Side of Occupation'. Focused on less explored and under-addressed occupations, it is an idea which challenges traditional assumptions around the positive, beneficial, health-promoting relationship between occupation and health. Emphasising that people's individual experiences of occupations are not always addressed and may not always be legal, socially acceptable, or conducive to good health, the book investigates how these experiences can be explored theoretically, in practice and research, and in curriculum content for those learning about occupation. Beginning with a discussion of some assumptions and misunderstandings that have been made about the concept, the substantive chapters present and analyse tangible examples of the concept's applicability. This ground-breaking and practice-changing text provides ideas for future research and highlights contemporary, internationally relevant issues and concerns, such as the coronavirus pandemic. This book is an essential purchase for students in occupational therapy and science, and valuable supplementary reading for practitioners. It is also relevant to a wide interdisciplinary audience with an interest in human occupation, encompassing anthropologists, councillors, criminologists, nurses, and human geographers.
