Reinvent Your Business Model - Mark W. Johnson 2018-06-19
Named a Top 10 Business Strategy Book of 2018 by Inc. magazine In his pioneering book Seizing the White Space, Mark W. Johnson argued that business model innovation is the most proven path to transformational growth. Since then, Uber, Airbnb, and other startups have disrupted whole industries; incumbents such as Blockbuster, Sears, Toys "R" Us, and BlackBerry have fallen by the wayside; and digital transformation has become one of the business world's hottest (and least understood) slogans. Nearly a decade later, the art and science of business model innovation is more relevant than ever. In this revised, updated, and newly titled

edition, Johnson provides an eminently practical framework for understanding how a business model actually works. Identifying its four fundamental building blocks, he lays out a structured and repeatable process for reinventing an existing business model or creating a new one and then incubating and scaling it into a profitable and thriving enterprise. In a new chapter on digital transformation, he shows how serial transformers like Amazon leverage business model innovation so successfully. With rich new case studies of companies that have achieved new success and postmortems of those that haven't, Reinvent Your Business Model will show you how to: Determine if and when your organization needs a new business model Identify powerful new opportunities to serve your existing customers in existing markets Reach entirely new customers and create new markets through disruptive business models and products Seize opportunities for growth opened up by tectonic shifts in market demand, government policy, and technologies Make business model innovation a more predictable discipline inside your organization Business model innovation has the power to reshape whole industries--including retail, aviation, media, and technology--redistributing billions of dollars of value. This book gives you the tools to reshape your own company for enduring success. Reinvent Your Business Model is the strategic innovation playbook you need now and in the future.

Computers Helping People with Special Needs - Klaus Miesenberger 2008-07-04 Welcome to the proceedings of ICCHP 2008. We were proud to welcome participants from more than 40 countries from all con- nents to ICCHP. The International Programme Committee, encompassing 102 experts form all over the world, selected 150 full and 40 short papers out of 360 abstracts submitted to ICCHP. Our acceptance rate of about half of the submissions, demonstrates the scientific quality of the programme and in particular the proceedings you have in your hands. An impressive group of experts agreed to organize "Special Thematic Sessions" (STS) for ICCHP 2008. The existence of these STS sessions helped to bring the me-ing into sharper focus in several key areas of assistive technology. In turn, this deeper level of focus helped to bring together the state-of-the-art and mainstream technical, social, cultural and political developments. Our keynote speaker, Jim Fruchterman from BeneTech, USA highlighted the - portance of giving access to ICT and AT at a global level. In another keynote by H- old Thimbleby, Swansea University, UK, the role of user-centred design and usability engineering in assistive technology and accessibility was addressed. And finally, a combination keynote and panel discussion was reserved for WAI/WCAG2.0, which we expect to be the new reference point for Web accessibility from the summer of 2008 and beyond.

Dying for an iPhone - Jenny Chan 2020-06-02 Suicides, excessive overtime, and hostility and violence on the factory floor in China. Drawing on vivid testimonies from rural migrant workers, student interns, managers and trade union staff, Dying for an iPhone is a devastating expose of two of the world's most powerful companies: Foxconn and Apple. As the leading manufacturer of iPhones, iPads, and Kindles, and employing one million workers in China alone, Taiwanese-invested Foxconn's drive to dominate global electronics manufacturing has aligned perfectly

with China's goal of becoming the world leader in technology. This book reveals the human cost of that ambition and what our demands for the newest and best technology means for workers. Foxconn workers have repeatedly demonstrated their power to strike at key nodes of transnational production, challenge management and the Chinese state, and confront global tech behemoths. Dying for an iPhone allows us to assess the impact of global capitalism's deepening crisis on workers.'

The Enforcement of Intellectual Property Rights: A Case Book - L.T.C. Harms 2012-12
With this publication, WIPO and the author aim at making available for judges, lawyers and law enforcement officials a valuable tool for the handling of intellectual property cases. To that effect, the case book uses carefully selected court decisions drawn from various countries with either civil or common law traditions. The extracts from the decisions and accompanying comments illustrate the different areas of intellectual property law, with an emphasis on matters that typically arise in connection with the enforcement of intellectual property rights in civil as well as criminal proceedings.

Forensic Computing - Anthony Sammes 2007-08-18
In the second edition of this very successful book, Tony Sammes and Brian Jenkinson show how the contents of computer systems can be recovered, even when hidden or subverted by criminals. Equally important, they demonstrate how to insure that computer evidence is admissible in court. Updated to meet ACPO 2003 guidelines, Forensic Computing: A Practitioner's Guide offers: methods for recovering evidence information from computer systems; principles of password protection and data encryption; evaluation procedures used in circumventing a

system's internal security safeguards, and full search and seizure protocols for experts and police officers.

Totally Wired - Anastasia Goodstein 2007-03-20 "A must read for parents (and future parents) of teenagers. Consider Anastasia Goodstein as the daughter you totally 'get' - explaining all the behaviors of the daughter you totally don't 'get.' Consider this a parent/teen dictionary. Brilliant and lifesaving!" - Atoosa Rubenstein, former editor in chief of Seventeen magazine "Totally Wired is both an awakening and a comfort for adults who feel lost in the infinite alleys of cyberspace. Goodstein gives it to us straight - honestly examining the threats to kids, but also including fresh insights into the positive ways young people use the wired world in their lives." - Joe Kelly, president of Dads & Daughters and author of Dads and Daughters: How to Inspire, Understand, and Support Your Daughter Hooking up via MySpace, bullying on a blog. Using a cell phone as a tracking device? Clearly, being a teen today isn't the same as it used to be. So what are LiveJournal, Xanga, Facebook, and MySpace, and what exactly are teens doing on these sites? Totally Wired is the first inside guide to what teens are really doing on the Internet and with technology today. Author Anastasia Goodstein creates an informative and accessible guide that covers topics such as social networking, blogging, cyberbullying, and much, much more. Including interviews with a cross section of industry professionals and teenagers, and loaded with fascinating statistics and revealing anecdotes, Totally Wired is the first guide that explains to parents in easy-to-understand terms what kids are really up to online, and arms parents with the knowledge they need to promote Internet safety.

Great by Choice - Jim Collins 2011-10-13 THE NEW QUESTION Ten years after the worldwide bestseller Good to Great, Jim Collins returns with another groundbreaking work, this time to ask: Why do some companies thrive in uncertainty, even chaos, and others do not? Based on nine years of research, buttressed by rigorous analysis and infused with engaging stories, Collins and his colleague, Morten Hansen, enumerate the principles for building a truly great enterprise in unpredictable, tumultuous, and fast-moving times. THE NEW STUDY Great by Choice distinguishes itself from Collins's prior work by its focus not just on performance, but also on the type of unstable environments faced by leaders today. With a team of more than twenty researchers, Collins and Hansen studied companies that rose to greatness - beating their industry indexes by a minimum of ten times over fifteen years - in environments characterized by big forces and rapid shifts that leaders could not predict or control. The research team then contrasted these "10X companies" to a carefully selected set of comparison companies that failed to achieve

greatness in similarly extreme environments. THE NEW FINDINGS The study results were full of provocative surprises. Such as: * The best leaders were not more risk taking, more visionary, and more creative than the comparisons; they were more disciplined, more empirical, and more paranoid. * Innovation by itself turns out not to be the trump card in a chaotic and uncertain world; more important is the ability to scale innovation, to blend creativity with discipline. * Following the belief that leading in a "fast world" always requires "fast decisions" and "fast action" is a good way to get killed. * The great companies changed less in reaction to a radically changing world than the comparison companies. The authors challenge conventional wisdom with thought-provoking, sticky, and supremely practical concepts. They include 10Xers; the 20 Mile March; Fire Bullets then Cannonballs; Leading above the Death Line; Zoom Out, Then Zoom In; and the SMaC Recipe. Finally, in the last chapter, Collins and Hansen present their most provocative and original analysis: defining, quantifying, and studying the role of luck. The great companies and the leaders who built them were not luckier than the comparisons, but they did get a higher Return on Luck. This book is classic Collins: contrarian, data driven, and uplifting. He and Hansen show convincingly that, even in a chaotic and uncertain world, greatness happens by choice, not by chance.

Form in Intellectual Property Law - David Booton 2017-06-30
This book sets out to expose, analyse and evaluate the conflicting conceptions of legal judgment that operate in intellectual property law. Its central theme is the opposition between law-making by way of the creation of generally applicable rules and law-making done at the point of application through case-by-case decisions tailored to the particulars of individual circumstances. Through an exploration of form, the analysis sets out to provide insights into how

intellectual property law achieves a balance between various competing interests.

Building Customer-brand Relationships - Don E. Schultz 2015-01-28
Almost every advertising, promotion, or marketing communications textbook is based on an inside-out approach, focusing on what the marketer wants to communicate to customers and prospects. This text takes a different view - that the marketer and the customer build the ongoing brand value together. Rather than the marketer trying to 'sell', the role of the marketer is to help customer buy. To do that, a customer view is vital and customer insight is essential. Customer insights allow the marketer to understand which audiences are important for a product, what delivery forms are appropriate, and what type of content is beneficial. "Building Customer-Brand Relationships" is themed around the four key elements marketing communicators use in developing programs - audiences, brands, delivery, and content - but provides an innovative approach to marketing communications in the 'push-pull' marketplace that combines traditional outbound communications (advertising, sales promotion, direct marketing, and PR) with the inbound or 'pull' media of Internet, mobile communications, social networks, and more. Its 'customer-centric' media planning approach covers media decision before dealing with creative development, and emphasizes measurement and accountability. The text's concepts have been used successfully around the world, and can be adapted and adjusted to any type of product or service.
