Ramp tricks—skate moves made on, over, or around wood ramps, cement bowls, and half-pipes—are a key, albeit challenging, component of skateboarding. Hundreds of captioned, sequential photographs demonstrate precisely how these exacting moves are safely made in this indispensable guide to 40 ramp tricks. Beginning with basic moves, including stalls,

grinds, and slides, skaters gradually learn the particular positioning and balance needed to perform more advanced tricks such as flips and airs. A brief history of ramp skateboarding examines the birth of the genre as well as champions of the sport, including the pioneering Dogtown Crew and current stars Bob Burnquist and Tony Hawk.

Routledge Handbook of Street Culture -

Jeffrey Ian Ross 2020-10-06

Discussions of street culture exist in a variety of academic disciplines, yet a handbook that brings together the diversity of scholarship on this subject has yet to be produced. The Routledge Handbook of Street Culture integrates and reviews current scholarship regarding the history, types, and contexts of the concept of street culture. It is comprehensive and international in its treatment of the subject of street culture. Street culture includes many subtypes, situations, locations, and participants, and these are explored in the various chapters included in this book. Street culture varies based

on numerous factors including capitalism, market societies, policing, ethnicity, and race but also advances in technology. The book is divided into four major sections: Actors and street culture, Activities connected to street culture, The centrality of crime to street culture, and Representations of street culture.

Contributors are well respected and recognized international scholars in their fields. They draw upon contemporary scholarship produced in the social sciences, arts, and humanities in order to communicate their understanding of street culture. The book provides a comprehensive and accessible approach to the subject of street culture through the lens of an inter- and/or multidisciplinary perspective. It is also intersectional in its approach and consideration of the subject and phenomenon of street culture.

Skateboarding and the City - Iain Borden

2019-02-21

Skateboarding is both a sport and a way of life. Creative, physical, graphic, urban and

controversial, it is full of contradictions – a billion-dollar global industry which still retains its vibrant, counter-cultural heart.

Skateboarding and the City presents the only complete history of the sport, exploring the story of skate culture from the surf-beaches of '60s California to the latest developments in street-skating today. Written by a life-long skater who also happens to be an architectural historian, and packed through with full-colour images – of skaters, boards, moves, graphics, and film-stills – this passionate, readable and rigorously-researched book explores the history of skateboarding and reveals a vivid understanding of how skateboarders, through their actions, experience the city and its architecture in a unique way.

Hawk - Tony Hawk 2000

Four Wheels and a Board - Betsy Gordon

2022-11-01

A bold look at the creative, controversial, and

vibrant history of skateboarding, and the amazing skaters who continually reinvent it. Skateboarding isn't just a recreational activity, but a professional sport, lifestyle, art form, and cultural phenomenon. The striking book *Four Wheels and a Board* captures its spirited history, iconic skateboarders, diverse community, and the palpable passion of the people who love it. It includes contributions from the most influential names in the game, including Rodney Mullen, Tony Hawk, Mimi Knoop, and more. The gorgeously designed book presents objects, artifacts, and photographs from the Smithsonian's collections that exemplify the vitality and innovation of skate culture. Book chapters are organized chronologically by decade from the '60s to present day, starting with 20th-century surfboards, moving through technological changes, the disappearance of skate parks, the rise of social media and collaborations, and ending with never-before-seen objects from the 2020 Summer Olympics,

where skateboarding made its historic Olympic debut. Largely invented by youth, skateboarding has attracted punks, misfits, and dreamers looking for somewhere to belong. The book features skateboards and skaters who open dialogues about race, the gender binary, queerness, the displacement of Native people, and so much more, shining a light on people and places not often represented in traditional skateboard history. *Four Wheels and a Board* is a fresh look at a transformative culture, and one hell of a ride.

Impossible - Cole Louison 2011-07-19

Skateboarding: the background, technicality, culture, rebellion, marketing, conflict, and future of the global sport as seen through two of its most influential geniuses Since it all began half a century ago, skateboarding has come to mystify some and to mesmerize many, including its tens of millions of adherents throughout America and the world. And yet, as ubiquitous as it is today, its origins, manners, and methods are little

understood. *The Impossible* aims to get skateboarding right. Journalist Cole Louison gets inside the history, culture, and major personalities of skating. He does so largely by recounting the careers of the sport's Yoda—Rodney Mullen, who, in his mid-forties, remains the greatest skateboarder in the world, the godfather of all modern skateboarding tricks—and its Luke Skywalker—Ryan Sheckler, who became its youngest pro athlete and a celebrity at thirteen. The story begins in the 1960s, when the first boards made their way to land in the form of off-season surfing in southern California. It then follows the sport's spikes, plateaus, and drops—including its billion-dollar apparel industry and its connection with art, fashion, and music. In *The Impossible*, we come to know intimately not only skateboarding, but also two very different, equally fascinating geniuses who have shaped the sport more than anyone else.

Anhand empirischer Beispiele und entlang aktueller Themen wie die etwaige Olympia-Teilnahme, das Sponsoring großer Konzerne sowie städteplanerische Einbettungsversuche beschreibt er sowohl die Do-it-yourself-Kultur und Raumpraxis der Skateboarding-Kultur als auch den Kampf um öffentlichen Raum.

Hawk - Tony Hawk 2010-09-21

For Tony Hawk, it wasn't enough to skate for two decades, to invent more than eighty tricks, and to win more than twice as many professional contests as any other skater. It wasn't enough to knock himself unconscious more than ten times, fracture several ribs, break his elbow, knock out his teeth twice, compress the vertebrae in his back, pop his bursa sack, get more than fifty stitches laced into his shins, rip apart the

cartilage in his knee, bruise his tailbone, sprain his ankles, and tear his ligaments too many times to count. No. He had to land the 900. And after thirteen years of failed attempts, he nailed it. It had never been done before. Growing up in Sierra Mesa, California, Tony was a hyperactive demon child with an I44 IQ. He threw tantrums, terrorized the nanny until she quit, exploded with rage whenever he lost a game; this was a kid who was expelled from preschool. When his brother, Steve, gave him a blue plastic hand-me-down skateboard and his father built a skate ramp in the driveway, Tony finally found his outlet--while skating, he could be as hard on himself as he was on everyone around him. But it wasn't an easy ride to the top of the skating game. Fellow skaters mocked his skating style and dubbed him a circus skater. He was so skinny he had to wear elbow pads on his knees, and so light he had to ollie just to catch air off a ramp. He was so desperate to be accepted by young skating legends like Steve Caballero,

Mike McGill, and Christian Hosoi that he ate gum from between Steve's toes. But a few years of determination and hard work paid off in multiple professional wins, and the skaters who once had mocked him were now trying to learn his tricks. Tony had created a new style of skating. In Hawk Tony goes behind the scenes of competitions, demos, and movies and shares the less glamorous demands of being a skateboarder--from skating on Italian TV wearing see-through plastic shorts to doing a demo in Brazil after throwing up for five days straight from food poisoning. He's dealt with teammates who lit themselves and other subjects on fire, driving down a freeway as the dashboard of their van burned. He's gone through the unpredictable ride of the skateboard industry during which, in the span of a few years, his annual income shrank to what he had made in a single month and then rebounded into seven figures. But Tony's greatest difficulty was dealing with the loss of his number one fan and

supporter--his dad, Frank Hawk. With brutal honesty, Tony recalls the stories of love, loss, bad hairdos, embarrassing '80s clothes, and his determination that had shaped his life. As he takes a look back at his experiences with the skateboarding legends of the '70s, '80s, and '90s, including Stacy Peralta, Eddie Elguera, Lance Mountain, Mark Gonzalez, Bob Burnquist, and Colin Mckay, he tells the real history of skateboarding--and also what the future has in store for the sport and for him.

Skateboarding and Religion - Paul O'Connor
2019-10-02

This book explores the ways in which religion is observed, performed, and organised in skateboard culture. Drawing on scholarship from the sociology of religion and the cultural politics of lifestyle sports, this work combines ethnographic research with media analysis to argue that the rituals of skateboarding provide participants with a rich cultural canvas for emotional and spiritual engagement. Paul

O'Connor contends that religious identification in skateboarding is set to increase as participants pursue ways to both control and engage meaningfully with an activity that has become an increasingly mainstream and institutionalised sport. Religion is explored through the themes of myth, celebrity, iconography, pilgrimage, evangelism, cults, and self-help.

The American Adrenaline Narrative - Kristin J. Jacobson 2020-06-01

The American Adrenaline Narrative considers the nature of perilous outdoor adventure tales, their gendered biases, and how they simultaneously promote and hinder ecological sustainability. To explore these themes, Kristin J. Jacobson defines and compares adrenaline narratives by a range of American authors published after the first Earth Day in 1970, a

time frame selected as a watershed moment for the contemporary American environmental movement. The forty-plus years since that day also mark the rise in the popularity and marketing of many things as "extreme," including sports, jobs, travel, beverages, gum, makeovers, laundry detergent, and even the environmental movement itself. Jacobson maps the American eco-imagination via adrenaline narratives, grounding them in the traditional literary practice of close reading analysis and in ecofeminism. She surveys a range of popular and lesser-known primary texts by American authors, including best-selling books, such as Jon Krakauer's *Into Thin Air* and Aron Ralston's *Between a Rock and a Hard Place*, and lesser-known texts, such as Patricia C. McCairen's *Canyon Solitude*, Eddy L. Harris's *Mississippi Solo*, and Stacy Allison's *Beyond the Limits*. She also discusses such narratives as they appear in print and online articles and magazines, feature-length and short films, television shows, amateur

videos, social networking site posts, fiction, advertising, and blogs. Jacobson contends that these stories constitute a distinctive genre because—unlike traditional nature, travel, and sports writing—adrenaline narratives sustain heightened risk or the element of the “extreme” within a natural setting. Additionally, these narratives provide important insight into the American environmental imagination’s connection to masculinity and adventure—knowledge that helps us grasp the current climate crisis and how narrative understanding provides a needed intervention.

Skateboard - Jonathan Russell Clark 2022-09-08
Object Lessons is a series of short, beautifully designed books about the hidden lives of ordinary things. How did the skateboard go from a menacing fad to an Olympic sport? Writer and skateboarder Jonathan Russell Clark answers this question by going straight to the sources: the skaters, photographers, commentators, and industry insiders who made such an unlikely rise to worldwide juggernaut possible. Skateboarders are their own historians, which means the real history of skating exists not in archives or texts but in a hodgepodge of random and iconic videos, tattered photographs, and, mostly, in the blurry memories of the people who lived through it all. From California beaches to Tokyo 2020, the skateboard has outlasted its critics to form a global community of creativity, camaraderie, and unceasing progression. Object Lessons is published in partnership with an essay series in The Atlantic.

Americana - Hampton Sides 2007-12-18
Harley-Davidson bikers . . . Grand Canyon river rats. . . Mormon archaeologists . . . Spelling bee prodigies . . . For more than fifteen years, best-selling author and historian Hampton Sides has traveled widely across the continent exploring the America that lurks just behind the scrim of our mainstream culture. Reporting for Outside, The New Yorker, and NPR, among other national media, the award-winning journalist has established a reputation not only as a wry observer of the contemporary American scene but also as one of our more inventive and versatile practitioners of narrative non-fiction. In these two dozen pieces, collected here for the first time, Sides gives us a fresh, alluring, and at times startling America brimming with fascinating subcultures and bizarre characters who could live nowhere else. Following Sides, we crash the redwood retreat of an apparent cabal of fabulously powerful military-industrialists, drop in on the Indy 500 of bass

fishing, and join a giant techno-rave at the lip of the Grand Canyon. We meet a diverse gallery of American visionaries— from the impossibly perky founder of Tupperware to Indian radical Russell Means to skateboarding legend Tony Hawk. We retrace the route of the historic Bataan Death March with veterans from Sides' acclaimed WWII epic, *Ghost Soldiers*. Sides also examines the nation that has emerged from the ashes of September 11, recounting the harrowing journeys of three World Trade Center survivors and deciding at the last possible minute not to "embed" on the Iraqi front-lines with the U.S. Marines. *Americana* gives us a sparkling mosaic of our country, in all its wild and poignant charm.

Dogtown und X-Games - die wirkliche

Geschichte des Skateboardfahrens - Eckehart Velten Schäfer 2020-03-31

Subkultur und Sportbetrieb: Passt das zusammen? Das fragten viele, als Skateboarding für 2020 zur Olympiadisziplin erklärt wurde. Einerseits gab es in der Geschichte dieser sportiven Praktik tatsächlich Phasen, in der sie mit »Sport« kaum zu tun hatte. Andererseits aber war Olympia schon in den 1960ern Thema. Ausgehend von Foucaults Überlegungen zur »wirklichen Historie« und orientiert an der jüngeren »praxeologischen« Kultursoziologie rekonstruiert Eckehart Velten Schäfer erstmals umfassend jene Pendelbewegung zwischen Sport- und Popkultur, in der Skateboarding zum paradigmatischen Fall dessen wurde, was man heute etwas unglücklich »Trendsport« nennt.

Slam - Nick Hornby 2012-07-31

"Rührend und durch und durch überzeugend."

The Guardian Sam, 15, kann kaum glauben, dass Alicia, die eigentlich eine Nummer zu groß für ihn ist, sich tatsächlich für ihn interessiert. Doch nach einer kurzen Zeit des Glücks kommt es knüppeldick: Könnte es sein, dass sie schwanger

ist? "Eigentlich lief alles gerade ziemlich gut. Ich würde sogar sagen, dass die Entwicklungen der letzten sechs Monate durchgängig positiv gewesen waren. Zum Beispiel hatte Mum sich von Steve getrennt, ihrem bescheuerten Freund. Zum Beispiel konnte ich plötzlich zwei neue Skatingtricks, nachdem ich mich wochenlang öffentlich blamiert hatte. Das alles, und außerdem hatte ich noch Alicia kennengelernt." Sam, selbst Sohn einer 32-jährigen Mutter, ist ein besessener Skateboardfahrer. Seine Bibel ist die Autobiographie des berühmten Skateboarders Tony Hawk, die für alle Lebensfragen das richtige Zitat bietet. Selbst als sich Sam in Alicia verliebt, läuft alles wie am Schnürchen und die beiden kommen tatsächlich zusammen. Doch dann droht die Glückssträhne zu reißen, denn Sam muss Angst haben, dass Alicia schwanger ist: Da mit der Angst zu leben immer noch besser ist, als zu wissen, dass die schlimmsten Befürchtungen Wirklichkeit geworden sind, nimmt Sam erstmal Reißaus. Mit

wunderbarer Ironie schildert Nick Hornby in seinem neuen Roman Sams Sprung ins Erwachsensein. Das ist erbarmungslos ehrlich, rührend und saukomisch.
