The Painted Screens of Baltimore - Elaine Eff 2013-10-23

Painted screens have long been synonymous in the popular imagination with the Baltimore row

house. Picturesque, practical, and quirky, window and door screens adorned with scenic views simultaneously offer privacy and ventilation in crowded neighborhoods. As an urban folk art, painted screens flourished in Baltimore, though they did not originate there—precursors date to early eighteenth-century London. They were a fixture on fine homes and businesses in Europe and America throughout the Victorian era. But as the handmade screen yielded to industrial production, the whimsical artifact of the elite classes was suddenly transformed into an item for mass consumption. Historic examples are now a rarity, but in Baltimore the folk art is still very much alive. The Painted Screens of Baltimore takes a first look at this beloved icon of one major American city through the words and images of dozens of self-taught artists who trace their creations to the capable and unlikely brush of one Bohemian immigrant, William Oktavec. In 1913, this corner grocer began a family dynasty inspired generations of artists who continue his craft to this day. The book examines the roots of painted wire cloth, the ethnic communities where painted screens have been at home for a century, and the future of this art form.

Zones of Control - Pat Harrigan 2016-04-15
Examinations of wargaming for entertainment, education, and military planning, in terms of design, critical analysis, and historical contexts. Games with military themes date back to

antiquity, and yet they are curiously neglected in much of the academic and trade literature on games and game history. This volume fills that gap, providing a diverse set of perspectives on wargaming's past, present, and future. In *Zones of Control*, contributors consider wargames played for entertainment, education, and military planning, in terms of design, critical analysis, and historical contexts. They consider both digital and especially tabletop games, most of which cover specific historical conflicts or are grounded in recognizable real-world geopolitics. Game designers and players will find the historical and critical contexts often missing from design and hobby literature; military analysts will find connections to game design and the humanities; and academics will find documentation and critique of a sophisticated body of cultural work in which the complexity of military conflict is represented in ludic systems and procedures. Each section begins with a long anchoring chapter by an established authority, which is followed by a variety of shorter pieces both analytic and anecdotal. Topics include the history of playing at war; operations research and systems design; wargaming and military history; wargaming's ethics and politics; gaming irregular and non-kinetic warfare; and wargames as artistic practice.
