The Bulletin of the National Association of Secondary School Principals - National Association of Secondary School Principals (U.S.) 1954

From the City Inside the Red River - Đình Hoà Nguyễn 1999

Born on January 17, 1924, Nguyen-Dinh-Hoa grew up in Hanoi never imagining the war that would ultimately divide his country and throw the region into chaos. As he grew into manhood, he witnessed Vietnam gain its independence in 1945, and like many men of his age he was swept up with the revolutionary mood that engulfed the entire country. Eager to do his part for the newly emerging Vietnam, he applied for and received a scholarship to Union College in Schenectady, New York. This resulted in an English degree and a teaching position at the University of Saigon.

Since childhood, the author has been keenly observant of everyday life, particularly the interactions between himself, his family and their community. His precise account of midcentury Vietnam provides a detailed picture of a beautiful country with a rich cultural heritage, and serves as a poignant reminder of the devastating effects of the war in Vietnam on its people.

STEM the Tide - David E. Drew 2015-05

Proven strategies for reforming STEM education in America's schools, colleges, and universities. One study after another shows American students ranking behind their international counterparts in the STEM fields—science, technology, engineering, and math. Businesspeople and cultural critics such as Bill Gates warn that this alarming situation puts the United States at a serious disadvantage in the high-tech global marketplace of the twenty-first century, and President Obama places improvement in these areas at the center of his educational reform. What can be done to reverse this poor performance and to unleash America's wasted talent? David E. Drew has good news—and the tools America needs to keep competitive. Drawing on both academic literature and his own rich experience, Drew identifies proven strategies for reforming America's schools, colleges, and universities, and his comprehensive review of STEM education in the United States offers a positive blueprint for the future. These research-based strategies include creative and successful methods for building strong programs in science and mathematics education and show how the achievement gap between majority and minority students can be closed. A crucial measure, he argues, is recruiting, educating, supporting, and respecting America's teachers. Accessible, engaging, and hard hitting, *STEM the Tide* is a

clarion call to policymakers, administrators, educators, and everyone else concerned about students' participation in the STEM fields and America's competitive global position.

Second Language Teacher Education - Diane J. Tedick 2013-06-17

The education of second language teachers takes place across diverse contexts, levels, settings, and geographic regions. By bringing together research, theory, and best practices from a variety of contexts (ESL/EFL, foreign language, bilingual and immersion education), this book contributes to building meaningful professional dialogue among second-language teacher educators. Featuring an international roster of authors, the volume is comprised of 18 chapters organized in four thematic sections: the knowledge base of second language teacher education; second language teacher education contexts; collaborations in second language teacher education; and second language teacher education in practice. *Second Language Teacher Education: International Perspectives* is an essential professional resource for practicing and prospective second language teacher educators around the world.

The Encyclopedia of Martial Arts Movies - Bill Palmer 1995-01-01

The Encyclopedia covers the genre from 1920 to 1994. The genre, however, can be very confusing: films often have several titles, and many of the stars have more than one pseudonym. In an effort to clarify some of the confusion, the authors have included all the information available to them on almost 3,300 films. Each entry includes a listing of the production company, the cast and crew, distributors, running times,

reviews with star ratings whenever possible, and alternate film titles. A list of film series and one of the stars' pseudonyms, in addition to a 7,900 name index, are also included. Illustrated.

Lucky Another Marriage - Hong YuGuoChuang 2019-12-28

I was born at eight o'clock in the morning!The fortune-teller said that if it was a boy, he would be either rich or noble. If it was a Girl, it would be terrible.Sure enough, my father died when I was young, and my husband became a vegetable when I was married.I put it all down to fate.However, he had appeared!He is tall and handsome and extremely rich. He sympathizes with me and likes me. He gives me warmth and help.However...The River Water of fate makes it impossible for us to be together!Time flew by.When the life of the River Water crashed countless waves and reefs in front of us, I was pleasantly surprised to discover that Fate, it didn't abandon me.There was no way out, and in the dark, there was another marriage!Darling, let's do it again in this hard-won marriage.They would walk and cherish each other, snuggling together forever ...

Community Chest - 1989

Voluntary contributions by private citizens and corporations in amounts ranging from a few coins to millions of dollars are a major factor in the maintenance of the American way of life. It is difficult to imagine the consequences if this source of support for the work of religious bodies, health and welfare agencies, and educational and research institutions were materially reduced. This case study, focused on Indianapolis, examines a critical mass fund-raising and giving program. Community chests in many communities evolved into the present-day United Way. In design, scope, and detail this study was without precedent when it was initially published in the 1950s. But "Community Chest "is more than an examination of local problems of fund raising. It also makes a decisive contribution to knowledge of philanthropic practice that is of general relevance to the social sciences. The book asks and seeks answers to the most ticklish issues of philanthropic fund raising: What may agencies expect in contributions from different social segments? How does one begin to estimate the need for philanthropic dollars in a given

community? How can the public guard the interests of both ultimate recipients of assistance and donors? In short, what elements are crucial to success or failure in financing voluntary agencies, not merely in terms of money but with full regard for the needs and potentials of citizens and the community as a whole? Sociologists, welfare personnel, and professionals involved in financial development will find in this book an extraordinary amount of material, both factual and interpretive, suggesting new approaches to the perplexing problems of community fund raising. A new introduction prepared by Carl Milofsky is a fascinating study of the tensions involved in the selection of the senior author, John R. Seeley, and of the critical response to this controversial study. This new material itself uniquely contributes to the sociology of knowledge.

Choosing the Right College 2014-15 - John Zmirak 2014-03-11

“By far the best college guide, for both its honesty and its insights.”
—Thomas Sowell Over the past decade, Choosing the Right College has established itself as the indispensable resource for students—and parents—who want the unvarnished truth about America’s top colleges and universities. It is the most in-depth, independently researched college guide on the market, using on-campus sources to turn up the best—and worst—aspects of nearly 150 schools. Just as important, Choosing the Right College covers the intellectual, political, and social

conditions that really matter, including: · The integrity and rigor of the curriculum · Which courses and professors to take—and which to avoid · The prevalence of politics in the classroom and the state of free speech—all highlighted with ISI's unique "traffic light" · Living arrangements, safety, and other keys to student life · How to get a real education at any school Beyond all that, this brand-new edition of *Choosing the Right College* features a host of innovations, including: "So You're Looking For..." top-five lists of colleges for all types of students; a quick list of each school's strengths and weaknesses; an insider's look at the pros and cons of online education; and more. This new edition of *Choosing the Right College* also provides the financial information families need in this age of soaring tuition. What are the most overpriced colleges—and which are relatively good values? What is the average student-debt load? To cap it all off, *Choosing the Right College* introduces the groundbreaking feature "Blue Collar Ivies"—in-depth reports on the best affordable colleges in all fifty states. *Choosing the Right College 2014-15* will completely change the way young people make a life-altering decision.

What You Need to Know about Motivation and Teaching Games: An in-depth analysis - Steven Ward 2008

Lean in the Classroom - Vincent Wiegel 2019-08-22

The current way of organizing education is not tenable in the coming decade. We need to address how we teach, how we organize schools, how we increase the effectiveness of learning, how we construct classrooms, and how we deploy new technologies. Lean management philosophy has been successfully applied across many industries - from manufacturing to healthcare, financial services, and construction. Recently, interest in Lean has steadily increased in the education sector, as it was originally introduced in that area's administrative and support processes. Currently, the introduction of Lean and its potential in education is gaining wider exposure because of massive looming changes - for example, the introduction of technology in education (as EdTech within the traditional system and as MOOCs), demographic changes, budget pressure, new pedagogies, the entrance of more and more private providers, and changing demands of society and industry on the curriculum. What is missing is a joint framework that will allow schools, teachers, directors, and boards to harness the potential of these developments and then execute a strategy. Lean Education (LE) offers the potential to streamline the execution of strategy and teaching. It accelerates the development of new courses and studies that are closely aligned to the needs of students. It supports the integration of new technologies without overburdening teachers and staff. Lean in the Classroom brings all these elements together into a coherent framework so schools can make necessary changes in one concerted effort. Teaching, professional support, managing the daily work, and changing the way schools function are brought together as a schoolwide strategy to organize learning in a way that serves our students by making the most of their talents. This book is the first to define LE in all its aspects: course design, actual teaching and learning processes, school management, and the organization of supporting processes. It is firmly based on the Lean management philosophy in conjunction with pedagogy. The book draws on both scientific research in the field of Lean management in general and Lean education in particular. In addition, it is predicated on many years of hands-on experience applying Lean both inside and outside the education sector.

Understanding Multimodal Discourses in English Language Teaching Textbooks - Christopher A. Smith 2022-08-11

Textbooks are indispensable components and in some case the cornerstones of the mission of English Language Teaching (ELT). However, they are artefacts of a pedagogical culture that rarely echo the concerns of their most prolific consumers: teachers and students. This book offers a useful framework for evaluating ELT textbooks from a critical discourse perspective; one that is based on sound current research but also offers practical guidance to teachers. Building from a foundational understanding of ELT textbooks, the author presents a systematic procedure to critically analyze their multimodal discourse, examine how those discourses are negotiated between teachers and students in class, and measure how those consumers privately value the lessons. The book provides teachers with the tools they need to select and adapt materials based on critical multimodal discourse analysis, where not only the text but the pictures, websites, audio, visual elements too are subjected to a process which can reveal underlying ideologies, assumptions, omissions and reifications. The triangulated approach, demonstrated in a series of vignettes featuring Korean university students and native-English-speaking instructors, can inform textbook choice, instigate change, and inspire lesson re-contextualization to best suit the needs of its primary consumers.

Summit - Joan Saslow 2016-12-06

With its fresh new look, the third edition of the Summit program helps

develop confident English speakers who are able to navigate a host of social and professional situations. This two-level course provides high-intermediate learners with an integrated set of global communication skills. It delivers immediate, demonstrable results through its goal- and achievement-based pedagogy and continual recycling of language. The two levels of Summit can be used with Top Notch as the fifth and sixth books in a complete six-level series. Summit 1 covers competencies from B2 to B2+ and Summit 2 introduces C1 competencies in the Common European Framework of Reference. The entire Summit course can be tailored to blended learning with its integrated online component, MyEnglishLab (access code available separately; not included in the Student Book). Highlights New Conversation Activator videos build communicative competence. New Discussion Activator videos increase range and depth of expression. Test-taking Skills Booster and extra challenge exercises help students succeed on the reading and listening sections of standardized tests. Greatly increased grammar, reading, listening, and writing practice plus digital grammar exercises give students the additional practice opportunities they've requested. Memorable models build natural, social language and conversation strategies. 50+ listening tasks at each level develop critical thinking and crucial listening comprehension skills, such as listening for details, confirmation of content, inference, and understanding meaning. ActiveTeach includes a digital Student Book for whiteboards with lesson plans, assessment tools and access to audio, video, and exercises to make learning more focused and interactive. Fluency-building planning activities such as idea framing help students express themselves with confidence. More ready-to-use teacher resources (including a broad range of print and digital components) than other courses make Summit easy to use for busy teachers.
