Foundations of Nursing Practice - Richard Hogston 2011-04-01

This is the key text for introductory level nursing, covering all the core areas. Practical and great value, it is comprehensive and also contains new chapters on cutting edge topics. Alongside an all-new companion website, this is an outstanding edition for CFP study from a tried and trusted team.

Professional Skills in Nursing - Rita Debnath 2009-10-21

"Students will find Rita Debnath's Professional Skills in Nursing a great introduction to the challenges of developing their clinical skills." - Mike Parkinson, Edinburgh Napier University What do I need to learn in order to progress through my course? How do I achieve the best possible patient-care? Professional Skills for Nurses answers both of these questions and supports the development of key nursing skills underpinned by theory. Designed specifically to meet the needs of nursing students in the initial stages of training, the book focuses on the essential knowledge and skills needed for effective patient-care while at the same time helping students to achieve the NMC outcomes required for entry into branch programmes. Each chapter focuses on a key aspect of nursing care backed up with - practical tips, - examples drawn from all branches of nursing, and - a range of study activities to help you reflect on your learning and get the most from practice placements. Key themes in healthcare such as ethics, evidence-based practice and health promotion are discussed throughout the book, highlighting how these relate to everyday nursing practice. Focusing on the core skills covered in the initial stages of training, Professional Skills in Nursing is the ideal introduction for students during the Common Foundation Programme.

Functional Ophthalmic Disorders - Robert Enzenauer 2014-11-19

This is a practical manual for diagnostic testing, focusing on the historical and contemporary research on functional disorders in general, and functional visual disorders in particular. Functional Ophthalmic Disorders: Ocular Malingering and Visual Hysteria is a how-to manual that is written for the practicing ophthalmologist and optometrist, complete with color photos that allow the reader to see pictures of select diseases. In addition to the photos, videos are provided online to illustrate the various tests and possible results conducted on a mock patient to assist in the differential diagnosis. Written and edited by leaders in the field, some of the topics covered include history of functional disorders, ophthalmologic examination in malingering and techniques and tests for functional and simulated defects.
