Land of Smoke and Mirrors - Vincent Brook 2013-01-22

Unlike the more forthrightly mythic origins of other urban centers—think

Rome via Romulus and Remus or Mexico City via the god Huitzilopochtli—Los Angeles emerged from a smoke-and-mirrors process that is simultaneously literal and figurative, real and imagined, material and metaphorical, physical and textual. Through penetrating analysis and personal engagement, Vincent Brook uncovers the many portraits of this ever-enticing, ever-ambivalent, and increasingly multicultural megalopolis. Divided into sections that probe Los Angeles's checkered history and reflect on Hollywood's own self-reflections, the book shows how the city, despite considerable remaining challenges, is finally blowing away some of the smoke of its not always proud past and rhetorically adjusting its rear-view mirrors. Part I is a review of the city's history through the early 1900s, focusing on the seminal 1884 novel *Ramona* and its immediate effect, but also exploring its ongoing impact through interviews with present-day Tongva Indians, attendance at the 88th annual *Ramona* pageant, and analysis of its feature film adaptations. Brook deals with Hollywood as geographical site, film production center, and frame of mind in Part II. He charts the events leading up to Hollywood's emergence as the world's movie capital and explores subsequent developments of the film industry from its golden age through the so-called New Hollywood, citing such self-reflexive films as *Sunset Blvd.*, *Singin' in the Rain*, and *The Truman Show*. Part III considers LA noir, a subset of film noir that emerged alongside the classical noir cycle in the 1940s and 1950s and continues today. The city's status as a privileged noir site is analyzed in relation to its history and through discussions of such key LA noir novels and films as *Double Indemnity*, *Chinatown*, and *Crash*. In Part IV, Brook examines multicultural Los Angeles. Using media texts as signposts, he maps the history and contemporary situation of the city's major ethno-racial and other minority groups, looking at such films as *Mi Familia* (Latinos), *Boyz n the Hood* (African Americans), *Charlotte Sometimes* (Asians), *Falling Down* (Whites), and *The Kids Are All Right* (LGBT).

What He Can Expect When She's Not Expecting - Marc Sedaka 2011-03-08

Marc Sedaka stood by while he and his wife endured endless rounds of drug therapies, sixteen artificial inseminations, ten in-vitro fertilizations, three miscarriages, and, finally, a gestational surrogate ("womb for rent") who carried their twin girls to term. He was as supportive and loving as he could be, but he really wished he'd had a book like What He Can Expect When She's Not Expecting during the process. Most books about dealing with infertility are geared toward women, leaving the man to his own devices when it comes to comfort and encouragement (never a good idea). With the help of his own infertility doctor, Sedaka provides straightforward guy-friendly advice on situations such as: What questions you should ask at the consultations. How to help rather than annoy. What kinds of tests you and your wife should expect. How to console a wife who appears inconsolable. How to enjoy procreation sex. Sedaka's accessible, empathetic voice, combined with the fact that he experienced everything he writes about, makes this a must-have book for any infertile couple.

Test Procedures for the Blood Compatibility of Biomaterials - S. Dawids
2012-12-06

This book represents the first European effort to provide a collection of test descriptions used in evaluation of the compatibility of biomaterials in contact with tissues and blood. The urge to compile this book arose from the fact that it is the properties of the material which ultimately seem to determine the functional outcome of a medical device, almost regardless of how ingenious the construction of the very device is. The longer the exposure is, the more important these basic properties become. Unfortunately only a small part of the interactive phenomena is fully elucidated and understood. This challenge reflects itself in an effort to cover numerous aspects of testing, beginning with fundamental analysis of the material, continuing with the mechanical properties, the resistance to degradation and the analysis of surface and chemical properties including adsorption patterns of proteins ending with test on cell cultures, ex vivo and in vivo. A number of the tests which are generally accepted as being important are already described as official requirements (primarily Pharmacopeas). These official requirements are not included in order to limit the size of the book. It is the aim of this

book to present the tests like a recipe in a uniform way to ease the reader in finding his/her way through the material and to present it as a kind of "cook-book" in an order to provide an easy access to copy the procedures. This has unfortunately not been possible in all circumstances.

Reclaiming the Strike Zone - Victor Alexander Baltov 2012-09-18
America has steadily regressed from a Republic under the Sign of the Cross towards a mobocracy under the Sign of the Scorpion. Social responsibility and the ethics of conscience have vacated the Field of Dreams like a Baroid tater -- an all about me cult of celebrity has evolved. Reclaiming the Strike Zone traces the metaphorical cleat marks through forbidden history. The Inside Baseball version of the Soviet Socialist Paradise and Nazi Germany is pitched shekel free. Sub-systems of the American superstructure featuring education, entertainment, youth activities and family are explored in-depth. The search for something that has been lost -- the secret of the American Dream and American Exceptionalism -- is pursued. All base paths lead to the Christian Church and Jewish Nation. Wise Christian philosophy has been Billy-Goated off the playing field -- secular humanism has taken The Hill. Karl Marx and Sigmund Freud have taken a turn at-bat and gone long. Red tide has been harnessed into Economic Determinism by the F&F Boys. The hidden ball trick has been pulled on the sheeple. Disciples of General Zod lack American patriotism. Time is of the essence to restore what has been taken -- its the bottom of the 9th with two away. DO IT AMERICAN and dont give up the ship are battle cries. Intellectual Millenials must step up to the plate and reclaim what their baby booming Spock baby parents baptized in Dewey waters booted. Identifying the proton pseudos and resetting is the task. Restoring sub-systems [especially education] while playing small ball is the answer. Truth and patriotic leadership are catalysts. A burning desire to be an American -- free and independent -- without getting JFKd is the secret. There is a happy ending -- it is certain. The Good News delivers that promise.
