Change Agil gestalten - Christiane Buck

2021-01-13

Wir begleiten Organisationen, Teams und Menschen schon lange auf ihren Wegen in

Veränderungen. Ob als erfahrene Führungskraft, Coach oder Projektleitung im internationalen Umfeld, immer steht der Mensch im Mittelpunkt unseres ganzheitlichen Denkens. In unserem Buch kombinieren wir die Ansätze verschiedener Herangehensweisen zu einem erfolgreichen Mix für eine agile Veränderungsbegleitung. Unsere

Sicht auf die Dinge ist lösungsorientiert und die zahlreichen Empfehlungen für die Praxis sind leicht umsetzbar. Wie agiler Change in Projekten gelingen kann, ist anschaulich dargestellt und mit relevantem Hintergrundwissen ergänzt.

Geschichten und viele Beispiele aus der Praxis machen das Buch zu einem Lern- und Lesevergnügen der besonderen Art!

Parking Structures - Anthony P. Chrest

2012-12-06

Drawing on the combined expertise of three of the world's leading parking structure experts, this updated edition provides the only single-source guide to planning, designing, and maintaining parking structures. It provides readers with design solutions, including material on how to ensure long-term durability, design for easy maintenance, select the most energy efficient lighting system, decide on the number and placement of entrances and exits, and avoid the most common construction pitfalls.

Reflecting recent advances in technological innovations, this volume features significantly revised material and contains five new chapters on the Americans with Disabilities Act, lighting, graphics, seismic design, and designing for maintenance. The Second Edition of *Parking Structures* offers architects, engineers, parking facility owners, and contractors a unique and comprehensive guide to designing safe and effective parking structures. In addition,

institutions providing education courses for professional registration in related fields will benefit from this timely, authoritative account. Studio Sound - 1992

Smart Product Engineering - Michael Abramovici 2013-03-14

The collection of papers in this book comprises the proceedings of the 23rd CIRP Design Conference held between March 11th and March 13th 2013 at the Ruhr-Universität Bochum in Germany. The event was organized in cooperation with the German Academic Society for Product Development - WiGeP. The focus of the conference was on »Smart Product Engineering«, covering two major aspects of modern product creation: the development of intelligent (“smart”) products as well as the new (“smart”) approach of engineering, explicitly taking into account consistent systems integration. Throughout the 97 papers contained in these proceedings, a range of topics are covered, amongst them the different facets and aspects of what makes a product or an engineering solution “smart”. In addition, the conference papers investigate new ways of engineering for production planning and

collaboration towards Smart Product Engineering. The publications provide a solid insight into the pressing issues of modern digital product creation facing increasing challenges in a rapidly changing industrial environment. They also give implicit advice how a “smart” product or engineering solution (processes, methods and tools) needs to be designed and implemented in order to become successful.
