The Global Community Yearbook of International Law and Jurisprudence 2009 Volume I - Giuliana Ziccardi Capaldo 2010-09-30

a. The set generally: [Please note that the following description applies to both volumes in the 2009 Yearbook, not solely to Volume I]. The Global Community Yearbook is a one-stop resource for all researchers studying international law generally or international criminal tribunals specifically. The Global Community Yearbook appears annually in two-volume editions of carefully chosen primary source material and corresponding expert commentary. The general editor, Professor Giuliana Ziccardi Capaldo, employs her vast expertise in international law to select excerpts from important court opinions and also to choose experts from around the world who contribute essay-guides to illuminate those cases. Although the main focus is recent case law from the major

international tribunals and regional courts, the first volume of each year's edition always features expert articles by renowned scholars who address broader themes in international law, themes that appear throughout the case law of the many courts covered by the series as a whole. b. This particular edition (2009): This year's edition of the Global Community Yearbook is restructured to update its format and to better respond to its objective. The change affects the section entitled Decisions of International Courts and Tribunals; all other sections will remain the same. This section, divided into twelve sub-Sections, presents annually the more significant international case law in the form of legal maxims, systematically collected. The elaboration of legal maxims, extracted from the courts' decisions, and their systematic classification makes this year's edition of the Yearbook unique. International courts and tribunals have developed remarkably in recent years, and it is becoming increasingly difficult to follow the case law emanating from those jurisdictions without the help of an intermediary. The Yearbook and its unique changes fill this gap by serving as an intermediary between the case law and international scholars, practitioners, and students. In previous issues of the Yearbook, these legal maxims were prepared by referring both to the law and often extensively to the specific facts of the case. In the new format, the legal maxims will now distil the most important elements of

judicial decisions and rely less heavily on the facts. The text of the legal maxims has been reduced to the minimum necessary for systematic classification, printing the website links for the case law. An introductory note on each international tribunal or court continues to be provided as a synopsis of their activity over the year. This reduction of the text of legal maxims better responds to the goals of the Yearbook to serve as a mediator and to provide complete coverage of case law from international courts and tribunals. c. Individual volumes: The first volume of the 2009 edition of Global Community Yearbook presents three categories of material wholly beneficial to any international law-researcher: International tribunals' court opinions, excerpted with scholarly skill by General Editor Giuliana Ziccardi Capaldo; expert guidance on those cases in the form of commentary by globally recognized luminaries whom Ziccardi has chosen personally; and more broadly focused introductory essays by similarly prominent scholars whom Ziccardi has also selected for that purpose. In the introductory essays, those scholars take on the current, controversial topics of the case against criminalizing hate speech, the global importance of human rights for environmental protection, the evolution of international environmental law, and the politics of global powers. Those incisive and knowledgeable introductory articles help frame the debates currently raging in international law before this volume leads the reader on to expert commentary on the noteworthy cases from this past year's dockets of the following tribunals: *The International Court of Justice *The WTO Dispute Resolution System *The International Criminal Court *International Criminal Tribunal for the Former Yugoslavia *International Criminal Tribunal for Rwanda Ziccardi has arranged the sections of this volume according to that list of tribunals, and she has included a short, targeted index for each of those sections, making any research in this volume efficient and fruitful. Volume 2: This second volume of the 2009 edition of Global Community Yearbook gives researchers an illuminating tour through the varied and dynamic law of regional and organizational courts. In the court opinion excerpts and expert commentary that fill this volume, researchers will find detailed

guidance on a rich diversity of legal topics, from whether the European Court of Human Rights is effective as the centerpiece of the European human rights protection system to the jurisdictional challenges by respondent States under applicable investment agreements. On these questions and a host of others, this volume provides to students, scholars, and practitioners alike a valuable combination of expert discussion and direct quotes from the court opinions to which that discussion relates. The courts covered by this particular volume are: *The Court of First Instance of the European Communities *The Court of Justice of the European Communities *The European Court of Human Rights *Inter-American Court of Human Rights *International Centre for the Settlement of Investment Disputes

The Routledge International Handbook of the Sociology of Education - Michael W. Apple 2009-12-16

This collection brings together many of the world's leading sociologists of education to explore and address key issues and concerns within the discipline. The thirty-seven newly commissioned chapters draw upon theory and research to provide new accounts of contemporary educational processes, global trends, and changing and enduring forms of social conflict and social inequality. The research, conducted by leading international scholars in the field, indicates that two complexly interrelated agendas are discernible in the heat and noise of educational change over the past twenty-five years. The first rests on a clear articulation by the state of its requirements of education. The second promotes at least the appearance of greater autonomy on the part of educational institutions in the delivery of those requirements. The Routledge International Handbook of the Sociology of Education examines the ways in which the sociology of education has responded to these two political agendas, addressing a range of issues which cover three key areas: perspectives and theories social processes and practices inequalities and resistances. The book strongly communicates the vibrancy and diversity of the sociology of education and the nature of 'sociological work' in this field. It will be a primary resource for teachers, as well as a title of major interest to practising sociologists of education.

Global Civil Society Yearbook 2009 - Ashwani Kumar 2009-05-13

The annual Global Civil Society Yearbooks provide an indispensable guide to global civil society or civic participation and action around the world. The 2009 Yearbook explores the framings, strategies and impacts of a range of actors on poverty and its alleviation. The overarching question is to whether such actors, in pressing for poverty alleviation actually achieve anything/empower the poor, or simply aid wealthy states

in maintaining the status quo. The contributors are diverse, including scholars and practitioners from India, America, the UK, Australia, Thailand, and Mali. The Global Civil Society Yearbook remains the standard work on all aspects of contemporary global civil society for activists, practitioners, students and academics alike. It is essential reading for anyone seeking a deeper understanding of the key actors, forms and manifestations of global civil society around the world today. Inside the Islamic Republic - Mahmood Monshipouri 2016-12-15

The post-Khomeini era has profoundly changed the socio-political landscape of Iran. Since 1989, the internal dynamics of change in Iran, rooted in a panoply of socioeconomic, cultural, institutional, demographic, and behavioral factors, have led to a noticeable transition

in both societal and governmental structures of power, as well as the way in which many Iranians have come to deal with the changing conditions of their society. This is all exacerbated by the global trend of communication and information expansion, as Iran has increasingly become the site of the burgeoning demands for women's rights, individual freedoms, and festering tensions and conflicts over cultural politics. These realities, among other things, have rendered Iran a country of unprecedented-and at time paradoxical-changes. This book explains how and why.

New Policies for New Residents - Deborah J. Milly 2014-02-07

In recent decades, many countries have experienced both a rapid increase of in-migration of foreign nationals and a large-scale devolution of governance to the local level. The result has been new government policies to promote the social inclusion of recently arrived residents. In *New Policies for New Residents*, Deborah J. Milly focuses on the intersection of these trends in Japan. Despite the country's history of restrictive immigration policies, some Japanese favor a more accepting approach to immigrants. Policies supportive of foreign residents could help attract immigrants as the country adjusts to labor market conditions and a looming demographic crisis. As well, local citizen engagement is producing more inclusive approaches to community. Milly compares the policy discussions and outcomes in Japan with those in South Korea and in two similarly challenged Mediterranean nations, Italy and Spain. All four are recent countries of immigration, and all undertook major policy innovations for immigrants by the 2000s. In Japan and Spain, local NGO-local government collaboration has influenced national policy through the advocacy of local governments. South Korea and Italy included NGO advocates as policy actors and partners at the national

level far earlier as they responded to new immigration, producing policy changes that fueled local networks of governance and advocacy. In all these cases, Milly finds, nongovernmental advocacy groups have the power to shape local governance and affect national policy, though in different ways.

Immigrants in American History - Elliott Robert Barkan 2013

This encyclopedia is a unique collection of entries covering the arrival, adaptation, and integration of immigrants into American culture from the 1500s to 2010. Few topics inspire such debate among American citizens as the issue of immigration in the United States. Yet, it is the steady influx of foreigners into America over 400 years that has shaped the social character of the United States, and has favorably positioned this country for globalization. *Immigrants in American History: Arrival, Adaptation, and Integration* is a chronological study of the migration of various ethnic groups to the United States from 1500 to the present day. This multivolume collection explores dozens of immigrant populations in America and delves into major topical issues affecting different groups across time periods. For example, the first author of the collection profiles African Americans as an example of the effects of involuntary migrations. A cross-disciplinary approach--derived from the contributions of leading scholars in the fields of history, sociology, cultural development, economics, political science, law, and cultural adaptation--introduces a comparative analysis of customs, beliefs, and character among groups, and provides insight into the impact of newcomers on American society and culture. Recent immigration and naturalization data from the 2010 U.S. Census Excerpts from American laws and customs A chronology of migration to the United States between 1500 to 2010

What to Expect When No One's Expecting - Jonathan V. Last
2014-06-10

Look around you and think for a minute: Is America too crowded? For years, we have been warned about the looming danger of overpopulation:

people jostling for space on a planet that's busting at the seams and running out of oil and food and land and everything else. It's all bunk. The "population bomb" never exploded. Instead, statistics from around the world make clear that since the 1970s, we've been facing exactly the opposite problem: people are having too few babies. Population growth has been slowing for two generations. The world's population will peak, and then begin shrinking, within the next fifty years. In some countries, it's already started. Japan, for instance, will be half its current size by the end of the century. In Italy, there are already more deaths than births every year. China's One-Child Policy has left that country without enough women to marry its men, not enough young people to support the country's elderly, and an impending population contraction that has the ruling class terrified. And all of this is coming to America, too. In fact, it's already here. Middle-class Americans have their own, informal one-child policy these days. And an alarming number of upscale professionals don't even go that far—they have dogs, not kids. In fact, if it weren't for the wave of immigration we experienced over the last thirty years, the United States would be on the verge of shrinking, too. What happened? Everything about modern life—from Bugaboo strollers to insane college tuition to government regulations—has pushed Americans in a single direction, making it harder to have children. And making the people who do still want to have children feel like second-class citizens. What to Expect When No One's Expecting explains why the population implosion happened and how it is remaking culture, the economy, and politics both at home and around the world. Because if America wants to continue to lead the world, we need to have more babies.

The Handbook of European Defence Policies and Armed Forces - Hugo Meijer 2018-06-21

The armed forces of Europe have undergone a dramatic transformation since the collapse of the Soviet Union. The Handbook of European Defence Policies and Armed Forces provides the first comprehensive analysis of national security and defence policies, strategies, doctrines, capabilities, and military operations, as well as the alliances and partnerships of European armed forces in response to the security

challenges Europe has faced since the end of the cold war. A truly cross-European comparison of the evolution of national defence policies and armed forces remains a notable blind spot in the existing literature. The Handbook of European Defence Policies and Armed Forces aims to fill this gap with fifty-one contributions on European defence and international security from around the world. The six parts focus on: country-based assessments of the evolution of the national defence policies of Europe's major, medium, and lesser powers since the end of the cold war; the alliances and security partnerships developed by European states to cooperate in the provision of national security; the security challenges faced by European states and their armed forces, ranging from interstate through intra-state and transnational; the national security strategies and doctrines developed in response to these challenges; the military capabilities, and the underlying defence and technological industrial base, brought to bear to support national strategies and doctrines; and, finally, the national or multilateral military operations by European armed forces. The contributions to The Handbook collectively demonstrate the fruitfulness of giving analytical precedence back to the comparative study of national defence policies and armed forces across Europe.

Planning Asian Cities - Stephen Hamnett 2012-03-29

In Planning Asian Cities: Risks and Resilience, Stephen Hamnett and Dean Forbes have brought together some of the region's most distinguished urbanists to explore the planning history and recent development of Pacific Asia's major cities. They show how globalization, and the competition to achieve global city status, has had a profound effect on all these cities. Tokyo is an archetypal world city. Singapore, Hong Kong and Seoul have acquired world city characteristics. Taipei and Kuala Lumpur have been at the centre of expanding economies in

which nationalism and global aspirations have been intertwined and expressed in the built environment. Beijing, Hong Kong and Shanghai have played key, sometimes competing, roles in China's rapid economic growth. Bangkok's amenity economy is currently threatened by political instability, while Jakarta and Manila are the core city-regions of less developed countries with sluggish economies and significant unrealized potential. But how resilient are these cities to the risks that they face? How can they manage continuing pressures for development and growth while reducing their vulnerability to a range of potential crises? How well prepared are they for climate change? How can they build social capital, so important to a city's recovery from shocks and disasters? What forms of governance and planning are appropriate for the vast mega-regions that are emerging? And, given the tradition of top-down, centralized, state-directed planning which drove the economic growth of many of these cities in the last century, what prospects are there of them becoming more inclusive and sensitive to the diverse needs of their populations and to the importance of culture, heritage and local places in creating liveable cities?

European Yearbook of International Economic Law 2019 - Marc Bungenberg 2020-01-13

Volume 10 of the EYIEL focusses on the relationship between transnational labour law and international economic law on the occasion

of the 100th anniversary of the International Labour Organisation (ILO). As one of the oldest UN Agencies, the ILO has achieved considerable progress with respect to labour rights and conditions. The contributions to EYIEL Volume 10 assess these achievements in light of current and future challenges. The ILO's core instruments and legal documents are analysed and similarly the impact labour standards have on trade and investment agreements. In its regional section, EYIEL 10 addresses recent developments in the US and the EU, including the US' trade policy strategy towards China as well as the reform of the NAFTA. In its part on institutions, EYIEL 10 focusses inter alia on the role of the rule of law in relation to current practices of the International Monetary Fund and of the WTO's Appellate Body as an international court. Furthermore, it provides an overview of current cases before the WTO. Finally, the volume entails a section with review essays on recently published books in the field of international economic law and international investment law.

NGOs - Thomas Richard Davies 2014

In the first historical account of international NGOs, from the French Revolution to the present, Thomas Davies places the contemporary debate on transnational civil society in context. In contrast to the conventional wisdom, which sees transnational civil society as a recent development taking place along a linear trajectory, he explores the long history of international NGOs in terms of a cyclical process characterized by three major waves: the era to 1914, the inter-war years, and the period since the Second World War. The breadth of transnational civil society activities explored is unprecedented in its diversity, from business associations to humanitarian organizations, peace groups to socialist movements, feminist organizations to pan-nationalist groups. The geographical scope covered is also extensive, and the analysis is richly supported with reference to a diverse array of previously unexplored sources. By revealing the role of civil society rather than governmental actors in the major transformations of the past two-and-a-half centuries, this book is for anyone interested in obtaining a new perspective on world history. The analysis concludes in the second decade of the twenty-first century, providing insights into the trajectory of transnational civil society in the post-9/11 and post-financial crisis eras.

The River Runs Black - Elizabeth C. Economy 2011-05-15

China's spectacular economic growth over the past two decades has dramatically depleted the country's natural resources and produced skyrocketing rates of pollution. Environmental degradation in China has also contributed to significant public health problems, mass migration, economic loss, and social unrest. In *The River Runs Black*, Elizabeth C. Economy examines China's growing environmental crisis and its implications for the country's future development. Drawing on historical research, case studies, and interviews with officials, scholars, and activists in China, the author traces the economic and political roots of China's environmental challenge and the evolution of the leadership's response. She argues that China's current approach to environmental protection mirrors the one embraced for economic development: devolving authority to local officials, opening the door to private actors,

and inviting participation from the international community, while retaining only weak central control. The result has been a patchwork of environmental protection in which a few wealthy regions with strong leaders and international ties improve their local environments, while most of the country continues to deteriorate, sometimes suffering irrevocable damage. Economy compares China's response with the experience of other societies and sketches out several possible futures for the country. This second edition is updated with information about events during the past five years, covering China's tumultuous transformation of its economy and its landscape as it deals with the political implications of this behavior as viewed by an international community ever more concerned about climate change and dwindling energy resources.
