International Business Transactions - Douglas Lee Donoho 2013-10-04

As suggested by its title, this e-book presents student-oriented materials focused on legal issues common to international business transactions. With an emphasis on sales of goods and services, the materials review international transactions from both the private law and governmental regulatory perspectives, domestic and international. Several features of the book distinguish it as a teaching tool from more traditional law school offerings. First, the book is offered in an electronic format which is designed to make extensive use of web-based resources. Among other advantages, this format (1) provides much cheaper, flexible and more accessible learning materials for students; (2) takes advantage of the excellent web-based resources that students are accustomed to using, including multi-media content; and (3) creates a flexible framework that allows professors to adapt, improve or otherwise modify content to suit their needs during successive iterations of the course. Second, the materials and format are designed to encourage students to take a more active role in their learning with an emphasis on skills building. Each chapter presents a problem and typically asks students to address legal issues as a practicing lawyer would, working through primary materials — cases, statutes and treaty texts. Third, the materials are written and prepared for the uninitiated and uninformed. Basic background explanations are always provided and all questions posed in the text are meant to be answered by the students — there are no abstract, obtuse or unanswerable questions set out in the materials. With guidance from their instructor, students are required to examine the material provided not only to learn the relevant law but also to build the essential skills of effective lawyering.

The Pragmatics of Quoting Now and Then - Jenny Arendholz 2015-07-31

In examining the phenomenon of quoting from multiple angles, The Pragmatics of Quoting Now and Then offers a fresh view on the forms, functions and usage of quoting as a meta-communicative act in various forms of old (printed) and new (electronically mediated) communication, setting it apart from (seemingly) related acts like repeating or referring. Recent interest in the formal (copy-paste quoting) and ethical (quoting as plagiarizing) aspects of quoting has been gaining considerable momentum in linguistics (and other disciplines), predominantly fuelled by enormous technological progress and the impact on both the procedure of quoting itself and its appraisal in public discourse. Embracing a broad, interdisciplinary perspective, the authors pay special tribute to the inherent complementarity of both synchronic and diachronic perspectives. With contributions pinpointing the formal and functional evolution of quoting and tracing trends in linguistic variation, this volume brings together interpersonal pragmatics, sociolinguistics, historical, cognitive and text linguistics as well as cultural studies. In this way, the present title provides a more comprehensive and integral understanding of the nature of quoting.
