This book is an introduction to the key concepts of the social philosopher and social theorist Michel Foucault. The text is written with clear examples to illustrate the relevance of Foucault's analysis of modern society. In particular, the book explores concepts of power, subjectivity and body. It highlights how Foucault's methods to investigate social issues of society such as mental illness and crime are derived from archaeology and genealogical analysis and also explores the strengths and limitations of Foucault's approach to social theory.

*The Host Gaze in Global Tourism* - Omar Moufakkir 2013

Most tourism theories have been developed from the tourists' perspective and focus on the Anglo-American experience. This unique book for researchers and students of tourism is the first to look at the host gaze; how it is constructed, how it has developed, how it varies between countries and how the tourism industry can affect it. By looking at the gazes of both Western and non-Western hosts, this book analyses the consequences such a gaze can have upon the tourist.

*Introduction to Qualitative Research Methods in Psychology* - Dennis Howitt 2019

*Introduction to Qualitative Research Methods in Psychology* by Dennis Howitt provides a comprehensive, practical and up to date coverage of the area. For the fourth edition, the text has been extensively revised for easier reading and comprehension. With a clear and straightforward style, the book introduces qualitative research from data collection to analysis. Examples of real research and practical guidance for each methodological approach are included throughout to equip the reader with an understanding of the process and the skills to be able to carry out their own research. There are also dedicated sections on ethics, quality and report writing. All of this is achieved while providing a thorough theoretical and historical context for the qualitative methods. With an increased focus on helping students to develop the practical skills for carrying out qualitative research, this 4th edition includes examples of how the theory can be put into practice throughout. Examples of qualitative reports, with annotated commentary give students a clear idea how to write up a report. The text covers a range of methods evaluating each in a constructive, non-partisan way.

*Working with Foucault in Education* - Margaret Walshaw 2007-01-01

Education has a long tradition of opening itself up to new ideas and new ideas are what *Working with Foucault in Education* is all about. The book introduces readers to the scholarly work of Michel Foucault at a level that it neither too demanding not too superficial.

*Shaping Claims to Urban Land* - Fons van Overbeek 2022-10-03

The concept of 'hybridity' is often still poorly theorized and problematically applied by peace and development scholars and researchers of resource governance. This book turns to a particular ethnographic reading of Michel Foucault's Governmentality and investigates its usefulness to study precisely those mechanisms, processes and practices that hybridity once promised to clarify. Claim-making to land and authority in a post-conflict environment is the empirical grist supporting this exploration of governmentality. Specifically in the periphery of Bukavu. This focus is relevant as urban land is increasingly becoming scarce in rapidly expanding cities of eastern Congo, primarily due to internal rural-to-urban migration as a result of regional insecurity. The governance of urban land is also important analytically as land governance and state authority in Africa are believed to be closely linked and co-evolve. An ethnographic reading of governmentality enables researchers to study hybridization without biasing analysis towards hierarchical dualities. Additionally, a better understanding of hybridization in the claim-making practices may contribute to improved government intervention and development assistance in Bukavu and elsewhere.

*NGOs and Organizational Change* - Alnoor Ebrahim 2005-05-12

Ebrahim analyses the organizational evolution of NGOs combining case studies with extensive review of literature.

*Theory for Beginners* - Kenneth B. Kidd 2020-11-03

Since its inception in the 1970s, the Philosophy for Children movement (P4C) has affirmed children's literature as important philosophical work. Theory, meanwhile, has invested in children's classics, especially Lewis Carroll's Alice books, and has also developed a literature for beginners that resembles children's literature in significant ways. Offering a novel take on this phenomenon, *Theory for Beginners* explores how philosophy and theory draw on children's literature and have even come to resemble it in their strategies for cultivating the child and/or the beginner. Examining everything from the rise of French Theory in the United States to the crucial pedagogies offered in children's picture books, from Alison Bechdel's graphic memoir *Are You My Mother?* and Lemony Snicket's *A Series of Unfortunate Events* to studies of queer childhood, Kenneth B. Kidd deftly reveals the way in which children may learn from philosophy and vice versa.

*Literary Theory For Beginners* - Mary Klages 2017-05-15

Have you heard the terms structuralism and deconstruction and postmodernism but aren't really sure what they mean? Have you taken a whole course on literary criticism but are still feeling lost? Here's the book you need to sort it all out—and enjoy doing so! In *Literary Theory For Beginners*, Mary Klages takes you

into her classroom, cuts through the jargon, and explains the ABCs (and the DEFs as well) in terms you can get your head around. Her breadth of knowledge, her unique skills as a teacher, and the delightful illustrations of Frank Reynoso help us understand why literature matters, how it affects us, and how it reflects history, culture, and diversity. Here are ways of thinking about literature—not just reading it—methods of study and frameworks of interpretation from classical humanism all the way up to psychoanalysis, gender and queer theory, race, postcolonialism, and, yes, postmodernism. With wit and wisdom, Klages takes on the two most frequently asked questions about literature and makes it all fun: What does the work MEAN? (What is the deeper, hidden, or symbolic meaning? Did the author intend all these meanings? Are any and all meanings present in the text? Are all meanings equally valid?) What does the work DO? (Why is literature important? What effect does it have on the reader? How can literature be a force for social change?) So sit back, relax, and take it all in!

Introducing Foucault - Christopher Horrocks 2004-01-01

This book places Michel Foucault's work in its turbulent philosophical and political context, and critically explores his mission to expose the links between knowledge and power in the human sciences, their discourses and institutions. It explains how Foucault overturned our assumptions about the experience and perception of madness, sexuality and criminality, and the often brutal social practices of confinement, confession and discipline.

**French XX Bibliography** - William J. Thompson 2007-09

Provides the listing of books, articles, and book reviews concerned with French literature since 1885. This is a reference source in the study of modern French literature and culture. It contains nearly 8,800 entries. *Postmodernism For Beginners* - Jim Powell 2007-08-21

If you are like most people, you're not sure what Postmodernism is. And if this were like most books on the subject, it probably wouldn't tell you. Besides what a few grumpy critics claim, Postmodernism is not a bunch of meaningless intellectual mind games. On the contrary, it is a reaction to the most profound spiritual and philosophical crisis of our time - the failure of the Enlightenment. Jim Powell takes the position that Postmodernism is a series of "maps" that help people find their way through a changing world. *Postmodernism For Beginners* features the thoughts of Foucault on power and knowledge, Jameson on mapping the postmodern, Baudrillard on the media, Harvey on time-space compression, Derrida on deconstruction and Deleuze and Guattari on rhizomes. The book also discusses postmodern artifacts such as Madonna, cyberpunk, Buddhist ecology, and teledildonics.

*Changing Anarchism* - Jonathan Purkis 2004

The massive protests against globalization in recent years have rekindled interest in anarchism. *Changing Anarchism* sets out to reposition anarchist theory and practice by documenting contemporary anarchist practice and providing a viable analytical framework for understanding it. The contributions here, from both academics and activists, raise challenging and sometimes provocative questions about the complex nature of power and resistance to it. The areas covered include: sexuality and identity; psychological dependency on technology; libertarian education; religion and spirituality; protest tactics; mental health and artistic expression; and the ongoing "metaphorical wars" against drugs and terror. This collection epitomizes the rich diversity that exists within contemporary anarchism as well as demonstrating its ongoing relevance as a sociological tool.

**Transformational Tourism** - Yvette Reisinger 2015-08-14

*Transformational Tourism* deals with the important issue of how travel and tourism can change human behaviour and have a positive impact on the world. The book focuses on human development in a world dominated by post-9/11 security and political challenges, economic and financial collapses, as well as environmental threats; it identifies various types of tourism that can transform human beings, such as educational, volunteer, survival, community-based, eco, farm, extreme, religious, spiritual, wellness, and mission tourism.

**Biopolitics for beginners** - Ottavio Marzocca 2021-02-25T00:00:00+01:00

The term biopolitics can be fully understood only within the context of modern forms of governing society. From this perspective, the development of modern medical knowledge, the re-organization of the hospital as a health institution, the growing attention to issues related to population, and the rise of biological

knowledge can be connected with the influence of economic rationality on the most important political strategies. In this book, the crucial role that the family has played throughout the history of biopolitics is also explored explaining how it is firstly a place of government of life as well as a means to extend various forms of biopower to the whole society. By analysing the works of key figures in the debate on biopolitics - such as Agamben, Negri, Esposito, Rose, Cooper, among others - this volume offers a systematic examination of this notion also in relation to the current ecological crisis and the pandemic of Covid-19, addressing fundamental problems of political thought and referring to great thinkers such as Foucault and Arendt, Plato and Aristotle. **The End of Gender** - Shari L. Thurer 2013-01-11

Gender isn't what it used to be. Categories are collapsing. What was deviant for baby boomers has become mainstream for their offspring: like the coed who realizes she's bisexual but, after a period of adjustment,

shrugs her shoulders and gets on with her otherwise mundane life. Gender as we once understood it is over, and gender-bending is the new beat. Men sport ponytails and earrings and teach nursery school; women flaunt tatoos and biceps and smoke cigars. In *The End of Gender*, Shari L. Thurer argues that we are in the midst of a new sexual revolution. It is one where gender categories are blurring not just at the "fringes" of society, but in mainstream lifestyle, media, fashion, and art. So, why is this cultural phenomenon happening now? And what does it mean? In lively, non-technical language, and with sometimes surprising case studies from her 25 years as a psychologist, Thurer answers these questions, bridging complex postmodern theory with cutting edge psychoanalysis.

[A Latina in the Land of Hollywood](#) - Angharad N. Valdivia 2022-09-13

From ads for Victoria's Secret to the character roles of Rosie Perez, the mass media have been defining race and femininity. In this diverse set of essays, Angharad N. Valdivia breaks theoretical and methodological boundaries by exploring the relationship of the media to various audiences. Throughout *A Latina in the Land of Hollywood* we are challenged to think differently about the media messages we often unconsciously consume, such as the popular representations of certain Latina cultural icons. Valdivia shows how reporters focus on Guatemalan activist Rigoberta Menchú's big smile, Brazilian media magnate Xuxa's blonde hair, and Puerto Rican actress Rosie Perez's high-pitched voice, never quite creating a comprehensive portrayal of these women. In her discussion of lingerie catalogs, Valdivia uncovers a similarly skewed depiction. The lush, high-class bedrooms of Victoria's Secret differ as much from the earthy, spare world of Frederick's of Hollywood as the types, sizes, and uses of the lingerie that the two companies sell. Valdivia takes a look at family films, arguing that single mothers are almost always portrayed as either trampy floozies or sexless, hapless women, whereas single dads fare much better. Whether examining one teenager's likes and dislikes or considering single parenthood in family films, Valdivia investigates how popular culture has become the arena in which we struggle to know ourselves and to make ourselves known. She calls for scholars to move beyond investigating implicit themes in films and media to studying the ways that audiences of different colors, ages, genders, and sexual preferences might understand or misunderstand such cultural messages. *A Latina in the Land of Hollywood* aims to explode traditional discussions of media and popular culture. It is a must-read for anyone interested in popular culture, television, and film.

[Theories and Texts](#) - Walter Hölbling 2007

*Theories and Texts*, a guide written by students for students, explores the critical ideas of twelve of the most influential philosophers of the last 150 years - Marx, Freud, Bakhtin, Lacan, Derrida, Barthes, Foucault, Bhaba, as well as a variety of feminist critics (Kristeva & the French feminists, black feminists, and theological feminists), New Historicists, and Postcolonialists. Carefully "digested" and then set out in lucid and easily accessible language, these essays explain major ideas of each critical approach and exemplify them through practical application to one or more literary texts. At a time when "theory" is on everybody's lips and yet is often more of a deterrent than an attraction for students of literature and culture, these essays show how theories can enrich our understanding of literature, facilitate our analysis of a particular text, elucidate the multiple layers of meaning, and thus significantly enhance the jussance in our acts of reading.

**Making Space** - Vanessa Sheared 2001

Building on new, emerging perspectives, *Making Space* examines the phenomenon of adult learning through multiple voices and promotes a critical analysis of the functions, structures, and activities that have perpetuated the silence and invisibility of marginalized groups in the field of adult education.

[After Foucault](#) - Lisa Downing 2018-06-07

The work of Michel Foucault is much read, widely cited, and occasionally misunderstood. In response to this state of affairs, this collection aims to clarify, to contextualize, and to contribute to Foucauldian

scholarship in a very specific way. Rather than offering either a conceptual introduction to Foucault's work, or a series of interventions aimed specifically at experts, *After Foucault* explores his critical afterlives, situates his work in current debates, and explains his intellectual legacy. As well as offering up-to-date assessments of Foucault's ongoing use in fields such as literary studies, sexuality studies, and history, chapters explore his relevance for urgent and emerging disciplines and debates, including ecology, animal studies, and the analysis of neoliberalism. Written in an accessible style, by leading experts, *After Foucault* demonstrates a commitment to taking seriously the work of a key twentieth-century thinker for contemporary academic disciplines, political phenomena, and cultural life.

**Starting With Foucault** - C. G. Prado 2000-12-22

Michel Foucault had a great influence upon a wide range of disciplines, and his work has been widely interpreted and is frequently referred to, but it is often difficult for beginners to find their way into the complexities of his thought. This is especially true for readers whose background is Anglo-American or "analytic" philosophy. C. G. Prado argues in this updated introduction that the time is overdue for Anglo-American philosophers to avail themselves of what Foucault offers. In this clear and greatly-revised second edition, Prado focuses on Foucault's "middle" or genealogical work, particularly *Discipline and Punish* and *Volume One of The History of Sexuality*, in which Foucault most clearly comes to grips with the historicization of truth and knowledge and the formation of subjectivity. Understanding Foucault's thought on these difficult subjects requires working through much complexity and ambiguity, and Prado's direct and accessible introduction is the ideal place to start.

[Feminist Thought](#) - Rosemarie Tong 2018-05-04

A classic resource on feminist theory, *Feminist Thought* offers a clear, comprehensive, and incisive introduction to the major traditions of feminist theory, from liberal feminism, radical feminism, and Marxist and socialist feminism to care-focused feminism, psychoanalytic feminism, and ecofeminism. The fifth edition has been thoroughly revised, and now includes a new chapter on Third Wave and Third Space Feminism. Also added to this edition are significantly expanded discussions on women of color feminisms, psychoanalytic and care feminisms, as well as new examinations of queer theory, LGBTQ and trans feminism. Learning tools like end-of-chapter discussion questions and the bibliography make *Feminist Thought* an essential resource for students and thinkers who want to understand the theoretical origins and complexities of contemporary feminist debates.

**The Search for Being** - Bonnie Lee Calcagno 2006-05-12

I graduated third in my college class. I was named both a Ralph Scholar and an Aquinas Scholar. But after graduation from college, I was lost. I would go to the library and wander the shelves looking for something I could not name. When I hit the psychology section of the library and started reading widely, everything fell into place. I wrote the book, *The Search for Being*, as separate articles over this period in my life. Each chapter represents the ideas of authors I consider to be my spiritual mentors who helped me to understand life, myself, what being is.

**A Foucault Primer** - Alec McHoul 2015-03-24

Who are we today? That deceptively simple question continued to be asked by the French historian and philosopher, Michel Foucault, who for the last three decades has had a profound influence on English-speaking scholars in the humanities and social sciences.; This text is designed for undergraduates and others who feel in need of some assistance when coming to grips with Foucault's voluminous and complex writings. Instead of dealing with them chronologically, however, this book concentrates on some of their central concepts, primarily Foucault's rethinking of the categories of "discourse", "power", and "the subject".; Foucault's writings contribute collectively to what he himself calls "an ontology of the present". His historical research was always geared towards showing how things could have been and still could be otherwise. This is especially the case with respect to the production of human subjects.

*The Order of Things* - Michel Foucault 1970

Traces the evolution of man's study of himself from seventeenth-century human sciences

**Political Philosophy in Motion \*.mkv** - Dan Dungaciu 2019-01-18

This book approaches the visual clues acknowledged by political philosophy, interested in the relationship of the philosophy and the politics of film. It also expresses and highlights a precise way of "looking at things", indicating a frame able to verify the domain's themes and constructs, in order not only to offer some illustrating insights, but also to provide reflections able to re-define the relationship between film and political philosophy. It will appeal to the wider academic community, PhD students, professors, and researchers with an interest in political philosophy, postmodern philosophy, media studies and cultural studies.

**Michel Foucault** - Clare O'Farrell 2005-09-16

I anticipate those teaching and taking courses on Foucault's work will find Clare O'Farrell's book to be an invaluable resource." - Barry Smart, University of Portsmouth "A marvellous introduction. This volume captures the penetrating interdisciplinary concerns that have made Foucault a guide to so many beyond the frontiers of philosophy and history, beyond the borders of the academic community itself... A wide-ranging list of resources and a bibliography of Foucault's work for easy consultation.

**Introducing Foucault** - Chris Horrocks 1997

When Foucault died in 1984, his work was described as 'the most important event of thought in our century'. As a philosopher, historian and political activist he has been tremendously influential, but is the acclaim justified?
