SSC English Topic-wise LATEST 35 Solved

Papers (2010-2016) - Disha Experts 2017-02-01
Topic-wise Solved Paper SSC English consists of past solved papers of SSC CGL, 10+2 CHSL, Sub-Inspector, Multi Tasking, and Stenographer from 2010 to 2016. The coverage of the papers has been kept RECENT (2010 to 2016) as they actually reflect the changed pattern of the SSC exams. Thus the papers prior to 2010 have not been included in the book. In all there are 35 Question papers from 2010 to 2016 which have been provided topic-wise along with detailed solutions. Practicing these questions, aspirants will come to know about the pattern and toughness of the questions asked in the examination. The strength of the book lies in the originality of its question papers and Errorless Solutions. The solution of each and every question is provided in detail (step-by-step) so as to provide 100% concept clarity to the students. The book will make the aspirants competent enough to crack the uncertainty of success in the Entrance Examination.

Colour and colour naming: crosslinguistic approaches - João Paulo Silvestre 2016-09-01
The Colour and Colour Naming conference, held in 2015 at the University of Lisbon, offered a chance to explore colour naming processes from a cross-linguistic approach. The conference was an initiative of the working group Lexicography And Lexicology from a Pan-European Perspective, itself part of the COST action European Network of Lexicography. The working group investigates the various ways by which vocabularies of European languages can be represented in dictionaries and how existing information from single language dictionaries can be displayed and interlinked to better communicate their common European heritage. The proceedings gather together a selection of studies originally presented at the conference. The first section of the volume outlines a Pan-European perspective of colour names; the second section is devoted to the categorisation and lexicographic description of colour terms.

Color Language and Color Categorization - Jonathan Brindle 2016-08-17

This volume represents a unique collection of chapters on the way in which color is categorized and named in a number of languages. Although color research has been a topic of focus for researchers for decades, the contributions here show that many aspects of

color language and categorization are as yet unexplored, and that current theories and methodologies which investigate color language are still evolving. Some core questions addressed here include: How is color conceptualized through language? What kind of linguistic tools do languages use to describe color? Which factors tend to bias color language? What methodologies could be used to understand human color categorization and language better? How do color vocabularies evolve? How does context impact the color cognition? The chapters collected here adopt different theoretical and methodological approaches in describing new empirical research on how the concept of color is represented in a variety of different languages. Researchers in linguistics, psychology, and cognitive science present a set of new explorations and challenges in the area of color language. The book promotes several methodological and disciplinary dimensions to

color studies. The color category is given an in-depth and broad-based examination, so a reader interested in color conceptualization for itself will be able to form a solid vision of the subject.
