Inquiry Into the Sun - S. Osborn 2003-11

Thoughts: The countless dancing shadows of the mind. By close examination, the mysterious inner light which cast them is found to possess a poetic, storied voice which, when in conversation with the curious, hints at the existence of its source--the infinite, peaceful, joyous soul. The poetry of Inquiry into the Sun is a collection of such conversations between that inner light and the author, curiously in search of his soul: "Awoke to melt into light, a dainty illumination, faint glow of incandescence. Within, without, a sky dissolved into this radiation; greenery attached itself, the grasslands, and trees, and then quickly departed into the blaze; what had become a sunny day, now saw the sun itself a shadow, and into the fires of love burned up the sun. The indistinguishable quality of such a heat, having no source, cannot be fiddled with by deceptive, malicious, or accidental ways. Intention save alone the pathway of discovery. Handling delicacies for practice, then wielding them as lasers. Cutting thru daybreak, the exterior of mass subsides. Standing tall in miniature ness, left to be found, expected, your You. Lifting a finger to touch the mirrored face, upon contact, more than one resident. Though as if to lookers on--the warmth and approval of a congregate interested in the good of all, gave thumbs-up to a union match as the one became the other; another One became both." --From the poem 'Hughe and Marta'
Inquiry Into the Treatment of Detainees in U.S. Custody - United States. Congress. Senate. Committee on Armed Services 2009

Empire of Dogs - Aaron Skabelund 2011-12-15

In 1924, Professor Ueno Eizaburo of Tokyo Imperial University adopted an Akita puppy he named Hachiko. Each evening Hachiko greeted Ueno on his return to Shibuya Station. In May 1925 Ueno died while giving a lecture. Every day for over nine years the Akita waited at Shibuya Station, eventually becoming nationally and even internationally famous for his purported loyalty. A year before his death in 1935, the city of Tokyo erected a statue of Hachiko outside the station. The story of Hachiko reveals much about the place of dogs in Japan's cultural imagination. In the groundbreaking *Empire of Dogs*, Aaron Herald Skabelund examines the history and cultural significance of dogs in nineteenth- and twentieth-century Japan, beginning with the arrival of Western dog breeds and new modes of dog keeping, which spread throughout the world with Western imperialism. He highlights how dogs joined with humans to create the modern imperial world and how, in turn, imperialism shaped dogs' bodies and their relationship with humans through its impact on dog-breeding and dog-keeping practices that pervade much of the world today. In a book that is both enlightening and entertaining, Skabelund focuses on actual and metaphorical dogs in a variety of contexts: the rhetorical pairing of the Western "colonial dog" with native canines; subsequent campaigns against indigenous canines in the imperial realm; the creation, maintenance, and in some cases restoration of Japanese dog breeds, including the Shiba Inu; the mobilization of military dogs, both real and fictional; and the emergence of Japan as a "pet superpower" in the second half of the twentieth century. Through this provocative account, Skabelund demonstrates how animals generally and canines specifically have contributed to the creation of our shared history, and how certain dogs have subtly influenced how that history is told. Generously illustrated with both color and black-and-white images, *Empire of Dogs* shows that human-canine relations often expose how people—especially those with power and wealth—use animals to define, regulate, and enforce political and social boundaries between themselves and other

humans, especially in imperial contexts.

The Poodle - Janice Biniok 2009

In this day and age, children and young adults need every advantage they can get from their education. At Eldorado Ink, we strive to establish our company as an exciting resource for nonfiction reference materials for sixth grade and beyond.

Ebook: Inquiry into Life - Mader; Windelsp 2016-04-16

Ebook: Inquiry into Life

An Experimental Inquiry into the laws of the Vital Functions, with some observations on the nature and treatment of internal diseases ... In part republished ... from the Philosophical Transactions of 1815 and 1817, with the Report of the National Institute of France on the experiments of M. Le Gallois drawn up by F. H. A. von Humboldt, J. N. Hallé and P. F. Percy, and observations on that Report - Alexander Philip Wilson PHILIP 1839

Animals in Our Midst: The Challenges of Co-existing with Animals in the Anthropocene - Bernice Bovenkerk 2021-04-29

This Open Access book brings together authoritative voices in animal and environmental ethics, who address the many different facets of changing human-animal relationships in the Anthropocene. As we are living in complex times, the issue of how to establish meaningful relationships with other animals under Anthropocene conditions needs to be approached from a multitude of angles. This book offers the reader insight into the different discussions that exist around the topics of how we should understand animal agency, how we could take animal agency seriously in farms, urban areas and the wild, and what technologies are appropriate and morally desirable to use regarding animals. This book is of interest to both animal studies scholars and environmental ethics scholars, as well as to practitioners working with animals, such as wildlife managers, zookeepers, and conservation biologists.

Your Dog Is Your Mirror - Kevin Behan 2012

Introduces the theory that a dog's behavior and emotion are driven by human emotion and dogs can be used to help their owners get in touch with their own feelings.

The Illusory Boundary - Martin Reuss 2010-08-06

This compelling new book challenges the view that a clear and unwavering boundary exists between nature and technology. Rejecting this dichotomy, the contributors show how the history of each can be united in a constantly shifting panorama where definitions of "nature" and "technology" alter and overlap.

Reports of the Commissioners of Inquiry Into the State of Education in Wales - Great Britain. Commissioners of Inquiry into the State of Education in Wales 1848

Plain and impartial Enquiry into Gospel-truth, as stated and vindicated by Mr D. Williams. Especially in reference to the doctrine of justification, etc - Esq. Thomas EDWARDS 1693

How Dogs Think - Stanley Coren 2008-12-26

Our understanding of how dogs think is littered with common misconceptions about the extent of their intellect and how they make sense of the world around them. *How Dogs Think* unravels the mystery of what a dog can understand and how much dogs can learn. World-renowned dog expert Stanley Coren explores the thought processes of dogs, describes how dogs solve problems, explains the depths and limits of their thinking and examines the kind of concepts which dogs can and cannot deal with. Along with practical advice for people who want to improve their dog's learning ability and working intelligence, *How Dogs Think* will answer such questions as: Do dogs have a notion of time? To what extent do dogs understand what you say? How sharp are their senses? What do they see and hear? Do dogs have a sense of music, humour, empathy, guilt or love? Do they learn by observation the way that people do? How much can they remember? Do dogs have ESP or the ability to predict earthquakes, and is it true that they can detect cancer or the onset of an epileptic fit in their owners? Drawing on all the latest scientific research, *How Dogs Think* will enable dog owners everywhere to understand more about what goes on in the mind of their best friend.

An Inquiry into Meaning and Truth - Bertrand Russell 2013-05-13

Bertrand Russell is concerned in this book with the foundations of knowledge. He approaches his subject through a discussion of language, the relationships of truth to experience and an investigation into how knowledge of the structure of language helps our understanding of the structure of the world. This edition includes a new introduction by Thomas Baldwin, Clare College, Cambridge

Domestic Dog Cognition and Behavior - Alexandra Horowitz 2014-02-19

This book highlights the state of the field in the new, provocative line of research into the cognition and behavior of the domestic dog. Eleven chapters from leading researchers describe innovative methods from comparative psychology, ethology and behavioral biology, which are combined to create a more comprehensive picture of the behavior of *Canis familiaris* than ever before. Each of the book's three parts highlights one of the perspectives relevant to providing a full understanding of the dog. Part I covers the perceptual abilities of dogs and the effect of interbreeding. Part II includes observational and experimental results from studies of social cognition - such as learning and social referencing - and physical cognition in canids, while Part III summarizes the work in the field to date, reviewing various conceptual and methodological approaches and testing anthropomorphisms with regard to dogs. The final chapter discusses the practical application of behavioral and cognitive results to promote animal welfare. This volume reflects a modern shift in science toward considering and studying domestic dogs for their own sake, not only insofar as they reflect back on human beings.

Animal Breeding, Welfare and Society - Jacky Turner 2010

The determination of when, how, how often and with whom an animal breeds is moving rapidly away from evolutionary pressures and towards human purposes: these include the breeding of around 50 billion mammals and birds for food production annually, the breeding of pedigree dogs and cats, racing dogs and horses, specialised laboratory animal strains and the use of reproductive science to conserve endangered species or breeds and to limit unwanted populations of pests and non-native species. But the ethics and sustainability of this takeover of animals' reproductive lives have been insufficiently examined by either professionals or the public. This book discusses the methods, the motivations and the consequences of human intervention in animal breeding in terms of animal health, behaviour and well-being. It explores where we are now and the choices ahead, and looks to a future where we have more respect for animals as sentient beings and where we could loosen the reins of reproductive control.

... und wenn es doch Liebe ist? - Clive Wynne 2019-10-23

Was macht die fünfzehntausend Jahre währende Bindung vom Hund an den Menschen und umgekehrt so einzigartig? Die Nützlichkeit des Hundes für den Menschen, sagten die einen. Der Opportunismus des Hundes, der beim Menschen ein bequemes Auskommen fand, sagten die anderen. Eine evolutionär herausgebildete besondere Form der Intelligenz, die Hunden ein außergewöhnliches Verstehen des menschlichen Verhaltens ermöglicht, so die aktuell am häufigsten vertretene These. Das alles greift zu kurz und wird der einzigartigen Lovestory zwischen Hund und Mensch nicht gerecht, meint Psychologieprofessor Clyve Wynne: Der Grund- und Eckstein der Hund-Mensch-Bindung ist so simpel wie

erstaunlich: Liebe! Dass ein Wissenschaftler es wagt, dieses Wort in den Mund zu nehmen, ist ungewohnt und geradezu unerhört. Warum es aber höchste Zeit dafür ist, erklärt dieses Buch so überraschend wie überzeugend und untermauert das, was Hundefreunde schon immer wussten, mit Fakten aus den Forschungslaboren von Universitäten auf der ganzen Welt: Hunde lieben uns mit jeder Faser ihrer Körperchemie und ihres Herzschlags tatsächlich mehr, als wir ahnen - wissenschaftlich nachweisbar und ganz ohne kitschige Wunschvorstellung.

The Truth about Dogs - Stephen Budiansky 2001

The author uses new evidence from the fields of behavioral science, archaeology, and neuroscience to provide fresh insights into canine behavior and personality. Reprint.

Inquiry into the truth and use of the Book of Enoch as to its prophecies, visions, etc - John OVERTON (of Chelsea.) 1822

Inquiry into Philosophical and Religious Issues - Rosemary Laoulach 2019-12-13

Inquiry into Religious and Philosophical Issues provides an educational experience of both wonder and discovery. The text's focus on epistemology applies this inquisitive discipline to an array of topics, including religious faith, ethics, personal meaning and happiness. Sources from philosophy, theology, and psychology interact with debates, role-playing, essays, and other student-centered activities to encourage meaningful thinking and engagement. Students are taught skills to develop personal awareness and resilience in order to help them flourish. Complex subjects such as religion and philosophy often lead to difficult questions and ideas that, for many students, go unheard. With *Inquiry into Religious and Philosophical Issues*, these questions and ideas will now have a voice.

The Other End of the Leash - Patricia McConnell, Ph.D. 2009-02-19

Learn to communicate with your dog—using their language “Good reading for dog lovers and an immensely useful manual for dog owners.”—The Washington Post An Applied Animal Behaviorist and dog trainer with more than twenty years' experience, Dr. Patricia McConnell reveals a revolutionary new perspective on our relationship with dogs—sharing insights on how “man's best friend” might interpret our behavior, as well as essential advice on how to interact with our four-legged friends in ways that bring out the best in them. After all, humans and dogs are two entirely different species, each shaped by its individual evolutionary heritage. Quite simply, humans are primates and dogs are canids (as are wolves, coyotes, and foxes). Since we each speak a different native tongue, a lot gets lost in the translation. This marvelous guide demonstrates how even the slightest changes in our voices and in the ways we stand can help dogs understand what we want. Inside you will discover: • How you can get your dog to come when called by acting less like a primate and more like a dog • Why the advice to “get dominance” over your dog can cause problems • Why “rough and tumble primate play” can lead to trouble—and how to play with your dog in ways that are fun and keep him out of mischief • How dogs and humans share personality types—and why most dogs want to live with benevolent leaders rather than “alpha wanna-bes!” Fascinating, insightful, and compelling, *The Other End of the Leash* is a book that strives to help you connect with your dog in a completely new way—so as to enrich that most rewarding of relationships.

Showing Kunga - Alxe Noden 2012

Insights into the world of dog shows and showing dogs from a complete beginner who now proudly calls herself a "Dog Show Junkie." Revealing, humorous and realistic, this may turn you into a junkie too!

An Inquiry Into Meaning & Truth - Bertrand Russell 1940

Beware of Dog - Melissa Crawley 2021-05-13

For many of us, the only way we meet "dangerous" dogs is through news reports about vicious attacks, and films and TV shows that feature out-of-control versions of man's best friend. But there's more to the Bad Dog's story than sensational headlines and movie beasts. A deeper look at these representations reveals a villain much closer to home. This book takes the reader on a rich journey through depictions of violent dogs in popular media. It explores how press accounts and screen stories transform canines into bloodthirsty hunters, rabies-infested strays, ferocious fighters, rogue law enforcement partners and diabolical pets, all adding up to a frightening picture of our usually beloved companions. But, when media tells the dangerous

dog's story, it is often with a deep connection to the person on the other end of the leash. Enquiry into the nature and effects of the nervous influence; and its connection with the vital, moral, and intellectual operations. A physiological, metaphysical, and moral essay, etc. [By Mrs. Carleton.] - Mrs. Carleton 1836

Dogs - Mark Alizart 2019-11-01

Man's best friend, domesticated since prehistoric times, a travelling companion for explorers and artists, thinkers and walkers, equally happy curled up by the fire and bounding through the great outdoors—dogs matter to us because we love them. But is that all there is to the canine's good-natured voracity and affectionate dependency? Mark Alizart dispenses with the well-worn clichés concerning dogs and their masters, seeing them not as submissive pets but rather as unexpected life coaches, ready to teach us the elusive recipes for contentment and joy. Dogs have faced their fate in life with a certain detachment that is not easy to understand. Unlike other animals in a similar situation, they have not become hardened, nor have they let themselves die a little inside. On the contrary, they seem to have softened. This book is devoted to understanding this miracle, the miracle of the joy of dogs – to understanding it and, if at all possible, to learning how it's done. Weaving elegantly and eruditely between historical myth and pop-culture anecdote, between the peculiar views of philosophers and the even more bizarre findings of science, Alizart offers us a surprising new portrait of the dog as thinker—a thinker who may perhaps know the true secret of our humanity.

First Friend - Katharine Rogers 2010-04

Dogs have shared our homes for as long as we can remember, and, in return, have guarded us, helped us hunt, and herded our livestock. They have generally been our friends as well; that is what most of them are today. Canine friends give us uncritical affection, free of the ambivalence that plagues human relationships. Dogs figure prominently in literature, starting with Homer's Argus, the hound who remembered Odysseus after twenty years. Victorian novels are full of vivid canine characters. "Ms. Rogers is impressively thorough...best of all, the author knows and respects dogs." Steve Goode, Washington Times

The Original Dog Bible - Kristin Mehus-Roe 2011-10-04

The woofasticsecond edition. "This attractive, copiously illustrated easy-to-understand volume covers every aspect of responsible dog ownership." —Library Journal The revised and expanded second edition of the bestselling The Original Dog Bible remains the most comprehensive dog lover's resource on the market! The book is divided into eight parts—each fully illustrated and designed for easy reference—plus helpful, entertaining sidebars covering hundreds of related topics. With detailed chapters on the requirements of caring for a dog, health, training, and so much more, this book will prepare you for a wonderful life with a dog. Also included is a catalog of over 250 purebred dog breeds with insightful articles for each! "Being a veteran veterinarian of twenty five years and a lifetime pet lover, I can enthusiastically say 'this old doc learned new tricks' upon reading the consummate book on all things dogs . . . I highly recommend it!" —Dr. Marty Becker, former resident veterinarian on ABC's Good Morning America and coauthor of Chicken Soup for the Dog Lover's Soul "This comprehensive book certainly lives up to its subtitle . . . The best part of the book, however, covers 'life with a dog,' with sections on pet care partners like sitters and walkers, emergencies, lost dogs, biting, traveling with a dog, and a fantastic chapter on activities one can do with one's dog." —Publishers Weekly

Being Human - Ron Broglio 2017-10-02

Technology and animals often serve as the boundaries by which we define the human. In this issue contributors explore these categories as necessary supplements or as porous membranes which disturb the scaffolding of how the human is constructed. A lingering question throughout is whether we have ever been human or if such a category is a non-localizable ideal or perhaps a misnomer. In this collection of essays, internationally known theorists muddle the categorical boundaries such that animals and technologies become necessary components rather than limits for what it means to be human. They examine a range of subjects, including apophatic animality, critical media objects-to-think-with, biosemiotic insect resonances, the monstrous and horrific which dislodges our cultural animals, and the problem of thinking of animality as stupidity. Novels, films, digital objects, scientific laboratories, philosophical texts, animals on the road

and in the fields serve as sites for inquiry. The result of these investigations is the spectral possibility that we are not the humans we make ourselves out to be. This book was originally published as a special issue of Angelaki.

Wonderdog - Jules Howard 2022-05-12

How dogs defied science and changed the way we think about animals What do dogs really think of us? What do dogs know and understand of the world? Do their emotions feel like our own? Do they love like we do? Driven by his own love of dogs, Charles Darwin was nagged by questions like these. To root out answers, his contemporaries toyed with dog sign language. To reveal clues, they made special puzzle boxes and elaborate sniff tests using old socks. Later, the same perennial questions about the minds of dogs drove Pavlov and Pasteur to unspeakable cruelty in their search for truth. These big names in science influenced leagues of psychologists and animal behaviourists, each building upon the ideas and received wisdom of previous generations but failing to see what was staring them in the face – that the very methods humans used to study dogs' minds were influencing the insights reflected back. To discover the impressive cognitive feats that dogs are capable of, a new approach was needed. Treated with love and compassion, dogs would open up their unique perspective on the world, and a new breed of scientists would be provided answers to life's biggest questions. Wonderdog is the story of those dogs – a historical account of how we came to know what dogs are capable of. It's a celebration of animal minds and the secrets they hold. And it's a love letter to science, through the good times and the bad.

Inquiry Into Satellite and Missile Programs - United States. Congress. Senate. Armed Services 1958

An Inquiry Into the Claims of Doctor William Harvey to the Discovery of the Circulation of the Blood - John Redman Coxe 1834

Canine Pathology - Delabere Pritchett Blaine 1824

The Do No Harm Dog Training and Behavior Handbook - Linda Michaels 2022-07-01

Get the dog training results you've always wanted—combining love with the science of dog psychology Find the roadmap to success in the easy-to-follow Do No Harm Dog Training and Behavior Handbook. Foreword by Marc Bekoff, PhD, co-founder with Jane Goodall of the Ethologists for the Ethical Treatment of Animals, and author of 31 books Are you tired of spending countless hours poring over articles, books, and other training resources searching for the key to the relationship you dream of with your dog? The Do No Harm Dog Training and Behavior Handbook provides force-free, practical solutions to common and complex behavior problems for both dog trainers and pet parents. This comprehensive guide is a transformational problem solving gift to pet parents for the heartbeats at our feet. It is also designed for professional presentations, teaching basic manners classes, and includes private behavioral consultation Treatment Plans with citations and a detailed index to make finding topics easy. Learn how to prevent behavior problems before they escalate.

Farm Dogs - Janet Vorwald Dohner 2016-10-04

The first comprehensive book to focus specifically on the fascinating world of working farm dogs, this highly photographic breed guide features 93 breeds of livestock guardians, herders, terriers, and other canines who have served as highly valued, working partners on the farm for generations. In-depth text highlights the history, temperament, and training that make these dogs uniquely qualified for their working roles.

Dog - Susan McHugh 2004-08-04

The story of the canine has been fundamentally entwined with that of humanity since the earliest times, and this ancient and fascinating story is told in Susan McHugh's Dog.

Dog Control and Welfare - Great Britain: Parliament: House of Commons: Environment, Food and Rural Affairs Committee 2013-02-15

DEFRA's belated proposals to tackle irresponsible dog ownership are too limited. Since 2007 dogs have killed seven people, including five children, in private homes. The NHS also spends over £3 million annually treating dog attack injuries. Some eight assistance dogs a month, and thousands of livestock annually, are

attacked by dogs. The Home Office approach to tackling antisocial behaviour is too simplistic; and fails to reflect the impact that poor breeding and training by irresponsible owners can have on a dog's behaviour. New rules should give enforcement officers more effective powers, including Dog Control Notices, to prevent dog-related antisocial behaviour. Local authorities need to devote more resources to the effective management of stray dogs. MPs call for changes in the legislation to give powers to extend the banned list to include other dogs with particularly aggressive characteristics. At the same time, those tasked to enforce legislation should have the discretion to neuter rather than destroy a banned animal where a particular dog poses no threat. The Advisory Council on Welfare Issues of Dog Breeding should be given a formal regulatory role to enforce standards. Any breeder producing more than two litters per year should be licensed and subject to welfare checks. The Kennel Club should stop registering puppies from breeders not compliant with its own Assured Breeder Scheme. It should also commission an independent annual review of Breed Standards led by vets to eliminate health problems linked to breeding for exaggerated characteristics. Lastly, MPs call on websites advertising pets to develop a voluntary Code of Practice

[Inquiry Into Operations of the United States Air Services](#) - United States. Congress. House. Select committee of inquiry into operations of the United States air services 1925

From Wolf to Supermutt and Everything In Between - Erika K Gósi 2022-05-17

When Erika adopted Mila, she naively believed that, like instant soup, she wouldn't have to go through the process of cooking all the ingredients from scratch. She wouldn't have to house train, obedience train or intensely socialise a mature dog. Mila quickly proved how misguided she was! Her favourite pastime was zealously chewing Persian rugs while the living room became her personal toilet. Alternatively, when asked

to sit, lie down, or come, she'd throw herself on her back in submission and refuse to move. Thunder and fireworks sent her rushing around in a mindless panic, while the sight of other dogs turned her into a screaming banshee. Does this sound familiar? Introducing *From Wolf to Supermutt and Everything In Between*, a book to guide you and your dog to happiness and harmony. Predominantly written with information based on research studies, the book also includes anecdotes based on Erika's own experience to give it the personal factor. Erika's portrayal of all things canine begins with their evolution and domestication, the fundamental processes that triggered our ongoing relationship with dogs. Additionally, the book banishes a few myths, and explores the significance of nature vs nurture, including the importance of genetics, breeding and socialisation. Understanding how our dogs think and learn, knowing the source of canine behaviour problems, including the impact of detrimental and positive training methods, we can preempt many behaviour problems and positively shape our dogs into happy hounds.

The Lives and Deaths of Shelter Animals - Katja M. Guenther 2020-08-18

Monster is an adult pit bull, muscular and grey, who is impounded in a large animal shelter in Los Angeles. Like many other dogs at the shelter, Monster is associated with marginalized humans and assumed to embody certain behaviors because of his breed. And like approximately one million shelter animals each year, Monster will be killed. *The Lives and Deaths of Shelter Animals* takes us inside one of the country's highest-intake animal shelters. Katja M. Guenther witnesses the dramatic variance in the narratives assigned different animals, including Monster, which dictate their chances for survival. She argues that these inequalities are powerfully linked to human ideas about race, class, gender, ability, and species. Guenther deftly explores internal hierarchies, breed discrimination, and importantly, instances of resistance and agency.
