Technology and Education Reform - Barbara Means 1997-01-01

Addresses the question of whether technology can provide significant support for constructivist, project-based teaching and learning approaches and the associated issue of the elements needed for an effective implementation of technology within an educational reform context. Includes case studies of 9 sites that have been using technology in ways that enhance a restructuring of the classroom around students' needs and project-based activities. Sites selected were those that emphasized education reform and provided challenging, authentic activities for students from economically disadvantaged backgrounds. Illustrated.

The Color of COVID-19 - Sharon A. Navarro 2022-06-17

The COVID-19 pandemic has disproportionately affected communities of color while highlighting the prevalence of structural racism in the United States. This crucial collection of essays, written by leading scholars from the fields of communications, political science, health, philosophy, and geography, explores the manifold ways in which the COVID-19 pandemic has impacted upon Black, Latinx, and Indigenous communities and the

way we see race relations in the United States. The COVID-19 pandemic has exposed the significance of U.S. health inequalities, which the World Health Organization defines as "avoidable [and] unfair." It has also highlighted structural racism, specifically, institutions, practices, values, customs, and policies that differentially allocate resources and opportunities so as to increase inequity among racial groups. Navarro and Hernandez therefore argue that the COVID-19 pandemic has unleashed a race war in America that has further marginalized communities of color by limiting access to resources by different racial and ethnic minorities, particularly women within these communities. Moreover, the systemic policies of the past that upheld or failed to address the unequal social conditions affecting Blacks, Latinxs, and other minorities have now been magnified with COVID-19. The volume concludes by offering recommendations to prevent future humanitarian crises from exacerbating racial divisions and having a disproportionate impact upon ethnic minorities. This timely volume will be of great interest to those interested in the study of race and the social impacts of the COVID-19 pandemic in the United States.

Alumni Cantabrigienses - John Venn 2011-09-15

Detailed and comprehensive, the second volume of the Venns' directory, in six parts, includes all known alumni until 1900.

New York City's Best Public, Pre-K, and Elementary Schools - Clara Hemphill 2016-12-13

For nearly 2 decades, parents have looked to Clara Hemphill to help them find a good public school for their child. This Fourth Edition features all-new reviews of more than 150 of the city's best public elementary schools, based on visits and in-depth interviews by the InsideSchools staff.

Computer Mathematics - Deepak Kapur 2008-09-29

This volume contains the proceedings of the Eighth Asian Symposium on Computer Mathematics (ASCM 2007), which was held at the Grand Plaza Park Hotel City Hall, Singapore, December 15-17, 2007. Previous ASCM meetings were held in Beijing, China (1995), Kobe, Japan (1996), Lanzhou, China (1998), Chiang Mai, Thailand (2000), Matsuyama, Japan

(2001), Beijing, China (2003), and Seoul, Korea (2005). Amongst 65 submissions by authors from 20 mostly Asian countries, the Program Committee selected 23 regular papers and 13 posters for presentation at the symposium. The presentations and papers went through another round of reviewing after the symposium, and 22 regular papers and 7 short papers on posters were selected for the proceedings. The international Program Committee of ASCM 2007 had strong Asian participation, and the reviewing process was aided by numerous reviewers from around the world. I am

very grateful to the Program Committee members and the reviewers for their work in evaluating the submissions before and after the conference. In addition to contributed papers, ASCM 2007 had three invited talks—by Rida Farouki on computational geometry, by Xiaoyun Wang on cryptology, and by Georges Gonthier on a computer proof of the celebrated Four Color Theorem. I would like to thank the speakers for their excellent talks. A paper by Prof. Farouki and his coauthors is included in the proceedings. Prof.
