German as Contact Zone - Russell West-Pavlov 2019-09-09 This book suggests that linguistic translation is one minute province of an immense process of creative activity that constitutes the world as an ongoing dynamism of unceasing transformation. Building upon the speculative quantum gravity theory, which provides a narrative of the push-pull dynamics of transformative translation from the very smallest scales of reality to the very greatest, this book argues that the so-called translative turn of the 1990s was correct in positing translation as a paradigmatic concept of transformation. More radically, the book stages a provocative provincialization of linguistic translation, so that literary translation in particular is shown to display a remarkable awareness of its own participation in a larger creative contact zone. As a result, the German language, literary translations in and out of German, and the German-language classroom, can be understood respectively as quantum contact zones. Russell West-Pavlov is Professor of Anglophone Literatures at the University of Tübingen and Research Associate at the University of Pretoria.

Grab this text if you're

looking for a celebration of what's possible in American schools." —Edutopia "A must-read for anyone interested in the fate of the American high school." —Linda Darling-Hammond, President and CEO, Learning Policy Institute What would it take to transform our high schools into places capable of supporting deep learning for students across a wide range of aptitudes and interests? To find out, Jal Mehta and Sarah Fine spent hundreds of hours observing and talking to teachers and students in and out of the classroom at thirty of the country's most innovative schools. To their dismay, they discovered that deeper learning is more often the exception than the rule. And yet they found pockets of powerful learning at almost every school, often in extracurriculars but also in a few mold-breaking academic courses. So what must schools do to achieve the integrations that support deep learning: rigor with joy, precision with play, mastery with identity and creativity? In Search of Deeper Learning takes a deep dive into the state of our schools and lays out an inspiring new vision for American education.

Why Read - Will Self 2022-11-03
'Will Self may not be the last modernist at work but at the moment he's the most fascinating of the tradition's torch bearers.' New York From one of the most unusual and distinctive writers working today, dubbed 'the most daring and delightful novelist of his generation' by the Guardian, Will Self's Why Read is a cornucopia of thoughtful and brilliantly witty essays on writing and literature. Self takes us with him: from the foibles of his typewriter repairman to the irradiated exclusion zone of Chernobyl, to the Australian outback and to literary forms past and future. With his characteristic intellectual brio, Self aims his inimitable eye at titans of literature like Woolf, Kafka, Orwell and Conrad. He writes movingly on W.G. Sebald's childhood in Germany and provocatively describes the elevation of William S. Burroughs's Junky from shocking pulp novel to beloved cult classic. Self also expands on his regular column in Literary Hub to ask readers how, what and ultimately why we should read in an ever-changing world. Whether he is writing on the rise of the bookshelf as an item of furniture in the nineteenth century or on the impossibility of

Googling his own name in a world lived online, Self's trademark intoxicating prose and mordant, energetic humour infuse every piece.

Beastie Boys Book - Michael Diamond 2018-10-30
#1 NEW YORK TIMES BESTSELLER • A panoramic experience that tells the story of Beastie Boys, a book as unique as the band itself—by band members ADROCK and Mike D, with contributions from Amy Poehler, Colson Whitehead, Wes Anderson, Luc Sante, and more. The inspiration for the Emmy-nominated Apple TV+ "live documentary" Beastie Boys Story, directed by Spike Jonze NAMED ONE OF THE BEST BOOKS OF THE YEAR BY Rolling Stone • The Guardian • Paste Formed as a New York City hardcore band in 1981, Beastie Boys struck an unlikely path to global hip hop superstardom. Here is their story, told for the first time in the

words of the band. Adam "ADROCK" Horovitz and Michael "Mike D" Diamond offer revealing and very funny accounts of their transition from teenage punks to budding rappers; their early collaboration with Russell Simmons and Rick Rubin; the debut album that became the first hip hop record ever to hit #1, Licensed to Ill—and the album's messy fallout as the band broke with Def Jam; their move to Los Angeles and rebirth with the genre-defying masterpiece Paul's Boutique; their evolution as musicians and social activists over the course of the classic albums Check Your Head, Ill Communication, and Hello Nasty and the Tibetan Freedom Concert benefits conceived by the late Adam "MCA" Yauch; and more. For more than thirty years, this band has had an inescapable and indelible influence on popular culture. With a style as distinctive and eclectic as a Beastie Boys album, Beastie Boys Book upends the typical music memoir. Alongside the band narrative you will find rare photos, original illustrations, a cookbook by chef Roy Choi, a graphic novel, a map of Beastie Boys' New York, mixtape playlists, pieces by guest contributors, and many more surprises. Praise for Beastie Boys Book "A fascinating, generous book with portraits and detail that float by in bursts of color . . . As with [the band's] records, the book's structure is a lyrical three-man weave. . . . Diamond's voice is lapidary, droll. Horovitz comes on like a borscht belt comedian, but beneath that he is urgent, incredulous, kind of vulnerable. . . . Friendship is the book's subject as much as music, fame and New York."—The New York Times Book Review "Wild, moving . . . resembles a Beastie Boys LP in its wild variety of styles."—Rolling Stone

The Brain That Changes Itself - Norman Doidge 2007-03-15
"Fascinating. Doidge's book is a remarkable and hopeful portrait of the endless adaptability of the human brain."—Oliver Sacks, MD, author of The Man Who Mistook His Wife for a Hat What is neuroplasticity? Is it possible to change your brain? Norman Doidge's inspiring guide to the new brain science explains all of this and more An astonishing new science called neuroplasticity is overthrowing the centuries-old notion that the human brain is immutable, and proving that it is, in fact, possible to change your brain. Psychoanalyst, Norman Doidge, M.D., traveled the country to meet both the brilliant scientists championing neuroplasticity, its healing powers, and the people whose lives they've transformed—people whose mental limitations, brain damage or brain trauma were seen as unalterable. We see a woman born with half a brain that rewired itself to work as a whole, blind people who learn to see, learning disorders cured, IQs raised, aging brains rejuvenated, stroke patients learning to speak, children with cerebral palsy learning to move with more grace, depression and anxiety disorders successfully treated, and lifelong character traits changed. Using these marvelous stories to probe mysteries of the body, emotion, love, sex, culture, and education, Dr. Doidge has written an immensely moving, inspiring book that will permanently alter the way we look at our brains, human nature, and human potential.

The Art of Biblical Interpretation - Heidi J. Hornik 2021-08-24
A richly illustrated collection of essays on visual biblical interpretation For centuries Christians have engaged their sacred texts as much through the visual as through the written word. Yet until recent decades, the academic disciplines of biblical studies and art history largely worked independently. This volume bridges that gap with the interdisciplinary work of biblical scholars and art historians. Focusing on the visualization of biblical characters from both the Old and New Testaments, essays illustrate the potential of such collaboration for a deeper understanding of the Bible and its visual reception. Contributions from Ian Boxall, James Clifton, David B. Gowler, Jonathan Homrighausen, Heidi J. Hornik, Jeff Jay, Christine E. Joynes, Yohana A. Junker, Meredith Munson, and Ela Nuțu foreground diverse cultural contexts and chronological periods for scholars and students of the Bible and art.

Grimspound and Inhabiting Art - Rod Mengham 2018-12-13
Rod Mengham's new offering comprises two complementary halves: a poetic meditation on a place (the Bronze Age site of Grimspound on Dartmoor); and a series of short essays on different cultural habitats. Grimspound is a four-part work combining prose and verse, composed on site over the course of ten years. It combines a 'wild analysis' of Hound of the Baskervilles (whose climactic scene takes place at Grimspound), a portrait of the Victorian excavator Sabine Baring-Gould, and a series of poems that draw on the Russian linguist Aharon Dolgopolsky's experimental Nostratic Dictionary. Inhabiting Art gathers essays on cultural history in relation to landscape and cityscape, viewed either episodically or in the form of a palimpsest, where the present state of the habitat both reveals and conceals its own history and prehistory.

Mythologizing the Vietnam War - Jennifer Good 2014-10-16
The Vietnam War is evolving from contemporary memory into history. Fifty years on, it still serves as a benchmark in the history of war reporting and in the representation of conflict in popular culture and historical memory. However, as contemporary culture tries to come to terms with the events and their political, psychological and cultural implications, the 'real' Vietnam War has been appropriated and changed into a set of mythologies which implicate American and Vietnamese national identities specifically, and ideas of modern conflict more broadly, particularly in shaping the mediation of the twenty-first century 'War on Terror'. This collection of interdisciplinary critical essays explores the cultural legacies of the US involvement in South East Asia, considering this process of 'mythologising' through the lenses of visual media and tracing the war's evolution from contemporary reportage to subsequent interpretation and consumption. It reassesses the role of visual media in covering and remembering the war, its memorialisation, mediation and memory. The origin of this collection of essays was an international conference, titled "Considering Vietnam", held at the Imperial War Museum, London, in February 2012, co-organised by the museum and the University of the Arts London Photography and the Archive Research Centre (PARC).

Academic Misconduct and Plagiarism - Bernard Montoneri 2020-11-15
This book discusses the issue of academic misconduct and publication ethics in general and plagiarism in particular, with a focus on case studies in various universities around the world (notably in Japan, Singapore, Australia, USA, and Canada). We are especially interested in students' and teachers' perception of academic misconduct and their definition and understanding of plagiarism. Most chapters discuss undergraduates' understanding of academic dishonesty and students' experiences using plagiarism softwares. The book also analyzes teachers' perception of cheating and how they respond to it. Writing is perceived by all of the teachers to be the most important form of assessment that required preventative measures in order to reduce the occurrence of academic dishonesty among students. Each chapter recommends strategies to fight plagiarism, such as establishing guidelines and regulations concerning academic integrity, awareness of the scale of the issue (scandals at

all levels in most countries, even including famous scholars, administrators, and elected officials), assessing the damage done to academic reputation and credibility, developing trust and credibility on social media (especially with the recent disturbing growth of fake news and data), minimizing the proliferation of dishonest accreditation, of identity theft, of fake peer-reviews, and fighting the growing number of fake papers, with or without the use of computer-generated academic works.
