Incidental Trainer - Margaret Wan 2013-11-23

"We have trained and trained. The employees still don't get it!" Although a critical component in improving organizational performance, training is usually not conducted effectively and results in a waste of resources.

Often, subject-matter experts are given training responsibilities because of their technical expertise; however, just as often, the

Community Practice and Urban Youth - Melvin Delgado 2015-10-30

Community Practice and Urban Youth is for graduate level students in fields that offer youth studies and community practice courses.

Practitioners in these fields, too, will find the book particularly useful in furthering the integration of social justice as a conceptual and philosophical foundation. The use of food, environmental justice, and immigrant-rights and the book's focus on service-learning and civic engagement involving these three topics offers an innovative approach for courses.

*EBOOK: Services Marketing: Integrating Customer Focus Across the Firm* - Alan Wilson 2012-06-16

The Second European Edition of Services Marketing: Integrating Customer Focus Across the Firm by Wilson, Zeithaml, Bitner and Gremler uniquely focuses on the development of customer relationships through quality service. Reflecting the increasing importance of the service economy, Services Marketing is the only text that put the customer's experience of services at the centre of its approach. The core theories, concepts and frameworks are retained, and specifically the gaps model, a popular feature of the book. The text moves from the foundations of services marketing before introducing the gaps model and demonstrating its application to services marketing. In the second edition, the book takes on more European and International contexts to reflect the needs of courses, lecturers and students. The second edition builds on the wealth of European and International examples, cases, and research in the first edition, offering more integration of European content. It has also be fully updated with the latest research to ensure that it continues to be seen as the text covering the very latest services marketing thinking. In addition, the cases section has been thoroughly examined and revised to offer a range of new case studies with a European and global focus. The online resources have also been fully revised and updated providing an excellent package of support for lecturers and students.

**SPONTANEOUS CREATIVE IMAGERY** - Aina O. Nucho 1995-01-01

The purpose of this book is to make imagery techniques readily accessible to professionals in the health and mental health fields. Imagery techniques are a relatively new development in the health and mental health fields. Imagery techniques have been used with excellent results for acute as well as chronic illnesses. These techniques have also proven effective in easing predicaments of interpersonal relationships. Empirical research studies have accumulated to show that imagery techniques are cost effective short-term treatment procedures. Now that the various Health Maintenance Organizations are discovering that there are financial incentives in helping people maintain good health rather than wait to provide treatment after the person has developed an illness, imagery techniques should prove useful, in conjunction with conventional medical care, for both the prevention and treatment of illnesses of various kinds. It is addressed to practitioners and students in the various helping and healing professions. Social workers, psychologists, counselors, nurse practitioners and others will find this work useful. It may also be of interest to the general reader who intends to preserve good health or cope more effectively with some persistent health concern.

**The Elements of Instruction** - Michael H. Molenda 2020-10-26  
The Elements of Instruction provides a common vocabulary and conceptual schema of teaching and learning that is fully applicable to all forms of instruction in our digital-centric era. This critical examination of educational technology's contemporary semantics and constructs fills a major gap in the logical foundations of instruction, with special attention to the patterns of communication among facilitators, learners, and resources. The book proposes a new framework for organizing research and theory, clear concepts and definitions for its basic elements, and a new typology of teaching-learning arrangements to simplify the selection of optimal conditions for a variety of learning goals. As trends in media, technology, and methodology continue to evolve, these historically contextual, back-to-basics pedagogical tools will be invaluable to all instructional designers and educational researchers.
