Asian Business Networks - Gary G. Hamilton 1996

The economies of East and Southeast Asia continue to exhibit the world's fastest growth rates. This rapid expansion is served by the various business networks that dominate the economic landscape. Few scholars have examined these networks and fewer yet have compared and contrasted the striking regional differences found among them. The studies in this volume are among the first to offer a

comparative viewpoint. The contributing authors are specialists from Asia and the United States, who examine business networks in Japan, South Korea and the Chinese dominated economies of Taiwan, Hong Kong and Singapore. An interdisciplinary approach is adopted, the economic issues are considered in their sociological, organizational and political contexts.

Roland Stangl points out existing differences and explores the options for a Europe-wide uniformed

- Makota Ohtsu 2015-05-20

This book sheds new light on Japanese management and its social consequences. Since the collapse of the Japanese bubble economy, the once acclaimed Japanese-style management has been under serious criticism both inside and outside Japan, but this is not a new phenomenon: over the last 50 years, evaluation of Japan and Japanese management has fluctuated widely between extreme affirmation and extreme negation. This study is unique because it is a longitudinal analysis that covers 35 years it uses firsthand information from managers in major Japanese corporations; and by involving
