Clinical Wisdom and Interventions in Acute and Critical Care, Second Edition - Patricia E. Benner  
2011-03-28

This second edition of a classic text in nursing education describes the major domains of nursing practice in acute , critical and perioperative care within today's complex and technologically driven health care industry. Its focus on clinical reasoning - what it is and how it works - provides for a substantial text intended for undergraduate and graduate nursing students who are learning critical and acute care, for educators teaching clinical reasoning, and for those seeking to improve systems of care and leadership in clinical practice. Revised and updated to current pedagogy and practice needs, this second edition will expand upon the success of the first edition and become a classic on its own. Originally based on a three-year research project with interviews and observations of 205 RNs and APNs in critical care, emergency departments, perioperative areas, and emergency transport services, the second edition includes new interviews from acute care, critical care and perioperative nurses, and new commentary, among other improvements. Attention is paid to current IOM and nursing guidelines for system approaches to patient safety, with education and leadership implications described throughout. The authors bring to the second edition over a decade of experience using the first edition in the classroom and in-service settings. Key Features: Updates the classic first edition to current pedagogy and practice needs Articulates major areas of knowledge/skill in acute, critical care, and perioperative nursing practice Provides vivid examples that foster clinical imagination, reflection, and lifelong learning Assists faculty, educators, APNs and preceptors in teaching/mentoring nurses how to clinically reason (recognizing recurring clinical syndromes and patterns)

**Infection in the Intensive Care Unit, An Issue of Critical Care Nursing Clinics of North America, E-Book** - Todd Tartavouille 2017-02-08

Critical care units are high-risk areas which contribute to increased health care costs and increased patient morbidity and mortality. Patients in critical care units are commonly confronted with existing and the potential to develop infections. Critical care practitioners play a crucial role as initial providers to critically ill patients with infections through the delivery of timely and appropriate therapies aimed to prevent and treat patient infections. The responsibility of critical care practitioners include prudent delivery of care to treat current infections as well as ensuring the delivery of care does not increase the development of new infections. Aggressive infection control measures are needed to reduce infections in critical care settings. Dissemination of scholarly work on the topic of infection in critically ill patients can play a role in improving patient outcomes. The information provided on infections in this issue of Critical Care Nursing Clinics promotes the dissemination of current literature on a series of timely and relevant infection topics in critical care environments.

*Back To Basics* - Orchid Lee Lopez 2011-02-15

As a registered nurse for the last 28 years, my primary clinical expertise has been working in the pre-hospital environment as a flight nurse and a paramedic, as well as continuing to work in a variety of clinical areas which include the emergency department, pediatrics and endoscopy. My extensive clinical background has also given me the opportunity to work as a legal nurse consultant with one of the largest law firms in Arizona. As an EMS educator and program director of paramedic training programs for the last 20 years and most recently as the National Clinical Educator for one of the largest air medical transport companies, I truly enjoy teaching in a simple manner as to assure that students do have a strong basic understanding in making critical care decisions and that they will be providing the highest quality of patient care beginning from the least to the most invasive management of care for the patients they are transporting. My goal as a professional and as an EMS educator has always been and will continue to encourage students to have the desire to learn and grow in their profession, as well as contribute to EMS in a way that inspires positive change. **Critical Care Transport** - AMERICAN ACADEMY OF ORTHOPAEDIC SURGEONS. 2022-03-17

"Published in conjunction with the American Academy of Orthopaedic Surgeons (AAOS) and the American College of Emergency Physicians (ACEP), Critical Care Transport offers cutting-edge content relevant to any healthcare provider training in critical care transport. Like no other textbook in this market, Critical Care Transport thoroughly prepares medical professionals to function as competent members of a critical care team by covering the material that everyone—paramedics, nurses, physicians, and specialty crew—needs to know to operate effectively in the prehospital critical care environment. This book meets the curricula of major critical care training programs, including University of Maryland, Baltimore County (UMBC). It covers both ground and flight transport, and meets the objectives of critical care transport certification exams such as the Certified Flight Paramedic (FP-C) exam administered by the Board for Critical Care Transport Paramedic Certification. Content includes information specific to prehospital critical care transport, such as flight physiology, lab analysis, hemodynamic monitoring, and specialized devices such as the intra-aortic balloon pump. Standard topics such as airway management, trauma, and pharmacology are covered in the context of critical care. Chapters have been authored by leading critical care professionals across the country and represent the most current, state-of-the-art information on management of critical care patients. This dynamic textbook includes the following features to enhance learning: Skills, covering equipment, indications, contraindications, steps, and complications. A synopsis of signs and symptoms, differential diagnosis, and management points for each condition discussed. Tips on caring for special populations. Explanations of controversies. Management algorithms. An in-depth case study in each chapter. The International Association of Flight Paramedics (IAFP), which provides advocacy, leadership development, and educational opportunities for critical care paramedics, has endorsed Critical Care Transport!"--
