**Transkulturelle Politische Theorie** - Sybille de la Rosa 2015-10-22  
Diese Einführung in das junge Feld der transkulturellen Politischen Theorie richtet sich an Studierende und Lehrende der Politikwissenschaft und insbesondere der Politischen Theorie. Dabei werden in prinzipiell voneinander unabhängigen, aber aufeinander verweisenden Kapiteln spezifische Fragestellungen des Feldes anhand von Ausgangsproblemen erarbeitet. Da transkulturell orientierte Politische Theorie oftmals mit naiven Annahmen konfrontiert ist, die es zu differenzieren und relativieren gilt, wird genau das zum didaktischen Prinzip erhoben: Am Anfang jedes Kapitels wird eine intuitiv scheinbar richtige Ausgangsbehauptung thematisiert, die im Verlauf des Kapitels hinterfragt wird.

**Optogenetics** - Thomas Knopf 2012-04-19

Optogenetics is a fast-growing field concerning the invention, and use, of molecules that are genetically expressed in cells, and then either report on cellular physiology in optical form, or enable control of specific pathways in cells when actuated by light. This book reviews the current state, as well as the underlying principles and future directions, of a diversity of optogenetic tools of importance for observing and controlling cellular signaling and physiology. These tools are already revolutionizing neuroscience, and are starting to have impact on fields ranging from metabolism to development to cardiology. The book contains a dozen chapters written by world experts on these topics, half focusing on the optogenetic molecular tools themselves, and half on the genetic and hardware approaches that make them powerfully useful in intact tissues and organisms. Leading authors review the state-of-the-art in their field of investigation and provide their views and perspectives for future research Chapters are extensively referenced to provide readers with a comprehensive list of resources on the topics covered All chapters

include comprehensive background information and are written in a clear form that is also accessible to the non-specialist
