Positioning the Academic Library within the University - Leo Appleton 2021-05-14

Academic libraries are facing uncertain times. The international higher education environment

is very volatile and academic libraries and librarians can play a major role in helping to strategically position their parent institution within it. In doing so, there needs to be clarity as to what the position of the academic library is with regard to the role and function it has within the university and how library leadership can have pan-institutional influence and impact. There are several ways in which the academic library can position itself and this collection demonstrates many of these. Strategic alignment with the university and its mission is a fundamental part of successful positioning, as is being flexible, adaptable and responsive to changing needs, requirements and expectations. Developments in research support and scholarly communications, as well as super-convergences with other academic support departments, are examples of such responsiveness. These topics along with other emerging themes, such as library functions and institutional partnerships and collaborations, are all discussed in the book

and provide the reader with a rich variety of reflections and case studies on how academic libraries, from across the globe, have addressed their position within their institution. This book was originally published as a special issue of the journal *New Review of Academic Librarianship*.

And we provide a practical framework for planning it and executing it successfully - whatever the size of your business or your marketing team. Adopting a content marketing

approach is certainly not a short term, quick win tactic. But the chances are it could make a big difference to the effectiveness of your marketing. - Sunday: Adopt a content marketing mindset - Monday: Understand the different types of content - Tuesday: Develop your content marketing strategy - Wednesday: Get started with content planning - Thursday: Create compelling content - Friday: Get ready to share - Saturday: Learn how to measure success *Mexico and the Post-2015 Development Agenda* - Rebecka Villanueva Ulfgard 2017-03-03 This interdisciplinary edited collection presents original analysis on Mexico's transition from the Millennium to the Sustainable Development Goals, departing from three main perspectives. In what areas did Mexico gain leverage and actually contribute to the debate around the proposed SDGs? What are the challenges for Mexico with regard to the SDGs? How to handle the issue of congruence/dissonance in Mexico's accomplishment of the MDGs in relation to the

socioeconomic realities on the ground? The contributing authors examine what kind of state is needed to strengthen democratic politics and social justice, but also to improve the economic effectiveness of the state and thereby prospects for development. For Mexico, what is missing is a clear vision for creating a progressive, truly modern society where the notion of a social contract between the government and citizens could be established along the lines of a welfare state that is inclusive, sustainable, and transformative enough to tackle seriously the fundamental socioeconomic injustices dividing Mexicans.

Supporting Teachers: Improving Instruction - Tomáš Janík 2019

In the last decades, progress in the field of pre-

service and in-service teacher education has been evident. Despite the developments of curriculum programs, models and designs, various challenges are shaping the field. Models of teacher education are usually presented as 'research-based', but related research is often invisible or fragmented. The 'support for teachers' and the 'improvement of instruction' are only loosely coupled and their interdependence is not highlighted. These challenges were the impetus to initiate this publication. Individual approaches, models or designs of pre-service and in-service teacher education developed by the authors (action research, video clubs, lesson studies, and others) are introduced and their impact and shortcomings for further development are specified. In the concluding chapter, a reflective discussion across individual approaches to reveal particular issues that are shaping the field is provided. Practitioners as well as researchers in the field of teacher education can

benefit from this book.

Dialogues in Middle Level Education

Research Volume 1 - David C. Virtue

2022-07-22

Mirroring the roundtable discussions conducted at the 2020 Association for Middle Level Education (AMLE) conference, this volume highlights the dialogic knowledge-building process critical to advancing middle level teaching and research. Launching the new AMLE Innovations in Middle Level Education Research series, this collection captures the synergetic dialogue that occurs during professional meetings by collating and centering five recent studies on topics such as mathematics achievement, personalized and project-based learning, and teacher collaboration. A companion essay and critical external response accompanies each study, serving to re-situate original research and

reconsider findings in view of professional insights and external critique gained through discussion at AMLE 2020. Ultimately, these response essays foreground potential avenues for future research and alternative thinking, laying the groundwork for implementation of critical discussion in the classroom environment.

This text will benefit researchers, doctoral students, and academics in the fields of middle level education, educational research, and specifically research methods in education. Those interested in teaching and learning, and adolescent development more broadly, will also benefit from this volume.

The Sustainable Development Goals and Human Rights - Inga Winkler 2018-12-07

The Sustainable Development Goals (SDGs) were adopted in 2015. The SDGs make the central promise to Leave No One Behind and include a dedicated goal to reduce inequalities. Human rights advocates have put great hopes in the SDGs as an instrument for transformative change. But do they bring about the much-needed paradigm shift? Or were the extensive consultations and negotiations much ado about nothing? "Sustainable Development Goals and Human Rights: A Critical Early Review" follows two central lines of inquiry. The chapters examine to what extent do the SDGs live up to

the promise to reduce inequalities and provide for monitoring and policies that address the needs of marginalized and invisible populations. They further suggest transparent and binding accountability processes and mechanisms to ensure that the SDGs are more than lofty goals and bring power to their promise. The volume begins with three chapters that focus on different aspects of SDG 10 and the commitment to reduce inequalities. From this cross cutting SDG, the following three chapters look at the translation of equality and accountability into specific sectors: health (SDG 3) and labour (SDG 8). The chapters were originally published in a special issue of The International Journal of Human Rights.

Teaching, Learning and Scaffolding in CLIL Science Classrooms - Yuen Yi Lo 2021-05-15
This edited volume presents a collection of

empirical studies examining the teaching and learning processes in science classrooms in Content and Language Integrated Learning (CLIL) contexts. It is a timely contribution to the rapidly growing body of CLIL research in response to scholars' consistent calls for more classroom-based research on the issues in integration of content and language teaching in lessons. With the dual goal of content and language learning, students in CLIL programmes are also facing double challenges - mastery of abstract, cognitively demanding content knowledge and unfamiliar academic language. Focusing on the notion of "scaffolding", this edited volume demonstrates how science teachers can provide appropriate and timely scaffolding for their students to overcome the challenges in CLIL science classrooms. With studies from different educational settings (Hong Kong, Mainland China, Singapore and Australia) and epistemological paradigms, and adopting a variety of research designs, this

volume will provide key insights into CLIL pedagogy and teacher education. Originally published as special issue of Journal of Immersion and Content-Based Language Education 7:2 (2019).

[The Routledge Handbook of Collective Intentionality](#) - Marija Jankovic 2017-11-02
The Routledge Handbook of Collective Intentionality provides a wide-ranging survey of topics in a rapidly expanding area of interdisciplinary research. It consists of 36 chapters, written exclusively for this volume, by an international team of experts. What is distinctive about the study of collective intentionality within the broader study of social interactions and structures is its focus on the conceptual and psychological features of joint or shared actions and attitudes, and their implications for the nature of social groups and their functioning. This Handbook fully captures

this distinctive nature of the field and how it subsumes the study of collective action, responsibility, reasoning, thought, intention, emotion, phenomenology, decision-making, knowledge, trust, rationality, cooperation, competition, and related issues, as well as how these underpin social practices, organizations, conventions, institutions and social ontology. Like the field, the Handbook is interdisciplinary, drawing on research in philosophy, cognitive science, linguistics, legal theory, anthropology, sociology, computer science, psychology, economics, and political science. Finally, the Handbook promotes several specific goals: (1) it provides an important resource for students and researchers interested in collective intentionality; (2) it integrates work across disciplines and areas of research as it helps to define the shape and scope of an emerging area of research; (3) it advances the study of collective intentionality.

Ethical Water Stewardship - Ingrid Leman

Stefanovic 2020-10-20

This interdisciplinary book brings philosophers and non-philosophers to the table to address questions of water ethics, specifically in terms of how moral questions inform decision making around water security at local, national, and international scales. Water security, which pertains to the experience of assured access to clean water, is a broad concept that intersects human rights, politics, economics, law, legislation, public health, trade, agriculture, and energy. Decisions made at each of these intersection points have ramifications for human well being, especially for the populations that are marginalized in a societal and political sense. In this book, the ethical dimensions of decision-making at those intersection points are explored, and real-world examples are used to tease out some key insights. It charts how ethical consideration can help shape a future in which everyone will be water secure.

The Routledge Companion to Planning in the Global South - Gautam Bhan 2017-09-11

The Routledge Companion to Planning in the Global South offers an edited collection on planning in parts of the world which, more often than not, are unrecognised or unmarked in mainstream planning texts. In doing so, its

intention is not to fill a 'gap' that leaves this 'mainstream' unquestioned but to re-theorise planning from a deep understanding of 'place' as well as a commitment to recognise the diverse modes of practice that come within it. The chapters thus take the form not of generalised, 'universal' analyses and prescriptions, but instead are critical and located reflections in thinking about how to plan, act and intervene in highly complex city, regional and national contexts. Chapter authors in this Companion are not all planners, or are planners of very different kinds, and this diversity ensures a rich variety of insights, primarily based on cases, to emphasise the complexity of the world in which planning is expected to happen. The book is divided into a framing Introduction followed by five sections: planning and the state; economy and economic actors; new drivers of urban change; landscapes of citizenship; and planning pedagogy. This volume will be of interest to all those wanting to explore the complexities of planning practice

and the need for new theories of knowledge from which to draw insight to face the challenges of the 21st century.
