Medizinische Mikrobiologie - Ernest Jawetz
2013-04-17

Die Autoren ließen sich bei der Vorbereitung dieses Lehrbuchs von der Absicht leiten, diejenigen Gebiete der medizinischen Mikrobiologie kurz, exakt und in ihrem gegenwärtigen Stand darzustellen, die für die klinischen Infektionskrankheiten und ihre Chemotherapie von besonderer Bedeutung sind. Das Buch wendet sich in erster Linie an

Medizinstudenten sowie an die Ärzte im Krankenhaus und in der Praxis. Da jedoch in den letzten Jahren die Notwendigkeit für ein klares Verständnis der mikrobiologischen Grundtatsachen als Folge bedeutender Entwicklungen auf dem Gebiet der Biochemie, der Virologie und der Chemotherapie sowie auf weiteren Gebieten, die die Medizin direkt beeinflussen, gestiegen ist, wurde ein wesentlicher Teil des Lehrbuchs auf die Darstellung dieser grundlegenden Beobachtungen verwendet. Nach Aufnahme dieser Abschnitte wird sich das Lehrbuch wahrscheinlich auch für die Einführung von Studenten in den mikro biologischen Kurs als brauchbar erweisen. Im allgemeinen wurde auf methodische Einzelheiten und die Darstellung umstrittener Gebiete des Fachs verzichtet. Ferner sind die Autoren für jeden Ratschlag und jede Kritik dankbar. Die alle zwei Jahre fällige Neubearbeitung dieses Buches kann so den jeweiligen Wissensstand der medizinischen Mikrobiologie berücksichtigen. San Francisco, ERNEST JAWETZ Juli 1962 JOSEPH L. Rereading Fluency - Bess Altwerger 2007

Rereading Fluency is an important and timely book.... The authors do not just criticize current policies and practices but offer alternatives for improving the quality of reading assessment and instruction. - Richard L. Allington Has your school spent tens of thousands or more dollars on fluency-based reading assessment programs? If so, you might be getting less for your investment than you think. Did you know? There is little consensus on what exactly fluency is. The NRP's report - the basis for Reading First - failed to support its assertion that "it is generally acknowledged that fluency is a critical component of skilled reading." The relationship between fluency and comprehension may be vastly overstated by the conventional wisdom? Challenging commonly held notions of the effectiveness and importance of fluency, Rereading Fluency provides the vital information any teacher or administrator needs to determine the most effective way to help students read well. Combining a careful review of prior research with findings from their own thorough analysis of more than 120 second grade readers, Bess Altwerger, Nancy Jordan, and Nancy Rankie Shelton detail why, as a measure of reading success, fluency can fall flat. Using a

multischool, multiprogram study, they compare the effects of commercial, phonics-based programs and noncommercial literature-based programs on students' fluency and overall proficiency. The results will surprise you: Faster, more accurate readers aren't always better comprehenders. Decoding rates are highly variable among readers with similar comprehension levels. Commercial, phonics-based programs do not result in better decoding, faster and more accurate reading, or better comprehension. Performance on fluency assessments says little if anything about students' ability to read and understand literature. Altwerger, Jordan, and Shelton don't just dismantle the arguments for considering fluency a key component of reading, they come through with specific critiques of DIBELS and offer better ways to assess reading (effective and efficient, not just fluent) that can improve instruction, assessment, and the success of young readers. Whether your school is about to mandate a commercial reading program or a standardized fluency assessment, or it is trying to get out from under one, make Rereading Fluency, and make your powerful, research-based ally in the battle for improved assessment and instruction.

Developing Assessments for the Next Generation Science Standards - National Research Council 2014-05-29

Assessments, understood as tools for tracking what and how well students have learned, play a critical role in the classroom. Developing Assessments for the Next Generation Science Standards develops an approach to science assessment to meet the vision of science education for the future as it has been elaborated in A Framework for K-12 Science Education (Framework) and Next Generation Science Standards (NGSS). These documents are brand new and the changes they call for are barely under way, but the new assessments will be needed as soon as states and districts begin the process of implementing the NGSS and changing their approach to science education. The new Framework and the NGSS are designed

to guide educators in significantly altering the way K-12 science is taught. The Framework is aimed at making science education more closely resemble the way scientists actually work and think, and making instruction reflect research on learning that demonstrates the importance of building coherent understandings over time. It structures science education around three dimensions - the practices through which scientists and engineers do their work, the key crosscutting concepts that cut across disciplines, and the core ideas of the disciplines - and argues that they should be interwoven in every aspect of science education, building in sophistication as students progress through grades K-12. Developing Assessments for the Next Generation Science Standards recommends strategies for developing assessments that yield valid measures of student proficiency in science as described in the new Framework. This report reviews recent and current work in science assessment to determine which aspects of the Framework's vision can be assessed with available techniques and what additional research and development will be needed to support an assessment system that fully meets that vision. The report offers a systems approach to science assessment, in which a range of assessment strategies are designed to answer different kinds of questions with appropriate degrees of specificity and provide results that complement one another. Developing Assessments for the Next Generation Science Standards makes the case that a science assessment system that meets the Framework's vision should consist of assessments designed to support classroom instruction, assessments designed to monitor science learning on a broader scale, and indicators designed to track opportunity to learn. New standards for science education make clear that new modes of assessment designed to measure the integrated learning they promote are essential. The recommendations of this report will be key to making sure that the dramatic changes in curriculum and instruction signaled by Framework and the NGSS reduce inequities in science education and raise the level of science education for all students.
